

THE NEW MINI COUPÉ.

No to the straight and narrow. The rear spoiler of the new MINI Coupé is automatically deployed when the speed exceeds 80 km/h. The result is increased aerodynamic grip, for higher cornering speeds. The two-seater is available in the MINI Cooper Coupé, MINI Cooper S/SD Coupé and MINI John Cooper Works Coupé variants. And envious glances come as standard with all of them.

Life is a rollercoaster. Or at least, it is in the new MINI Coupé. With its stiffer bodywork, Sport button and, in the MINI Cooper S Coupé and MINI John Cooper Works Coupé, an extra overboost function, it improves on even the legendary responses of the MINI. So it's not just the car that accelerates quicker. It's your heartbeat too.

Speed never looked so stylish. The new MINI Coupé is a true designer sports car. Stylish elliptical design elements, a headliner in Anthracite, dynamic lines and sport stripes all help to make this two-seater a beauty as well as a beast.

Open up: the generously sized luggage compartment with through-loading function has 280 litres of space for all your adventure equipment. Its clever design means you can fit in snowboards, skateboards, boxes, crates, suitcases and pretty much anything else you need.

The MINI John Cooper Works Coupé was made for three things: driving, driving and driving. Anyone who's experienced its 155 kW (211 horsepower) won't need any more convincing. The six-speed manual transmission, the Sport button and the overboost function that increases its maximum torque from 260 to 280 newton-metres are all just an added bonus. Quite a big bonus though.

¹ All figures relate to vehicles with the standard six-speed manual transmission. Figures in square brackets relate to vehicles with six-speed Automatic Transmission Steptronic.

² All MINI models comply with the EU5 exhaust emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle (as defined in directive 80/1268/EEC), made up of approximately one third urban and two thirds extra-urban driving (based on the distance covered). CO₂ emissions are measured separately from fuel consumption. Figures relate to standard-specification vehicles, and may vary significantly where optional equipment (including wider tyres) is fitted.

³ With overboost function.

⁴ Assuming car is fuelled to 90% of usable tank capacity, and allowing 68 kilograms for the driver and 7 kilograms for luggage. Figure quoted is for standard-specification vehicles. Optional equipment will increase this figure.

⁵ For technical reasons, engine performance is reduced when it is tuned to avoid carbon deposits.

PERFORMANCE.

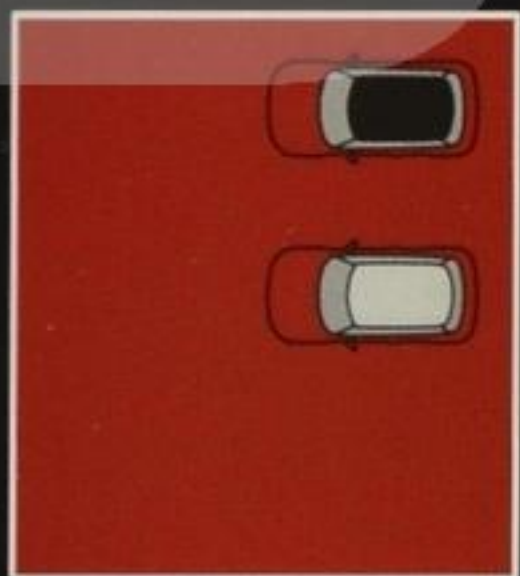

- 1 DESIGN: DYNAMIC.** The heavily slanted front windscreen and lower roof create a sweeping profile. Together with the sport stripes and spoiler, this makes for a look which isn't just elegant, but exudes speed.
- 2 ENGINE: POWERFUL.** The unbeatable combination of the two-seat coupé layout with state-of-the-art engines makes this a genuine sports car.
- 3 RESPONSES: INSTANTANEOUS.** Stiff bodywork, a low centre of gravity and incredibly direct steering add up to faster acceleration, better traction, and more wow factor.
- 4 AERODYNAMICS: BREATHTAKING.** The streamlined front end, low wind resistance and automatically extending rear spoiler deliver more grip, enhanced safety, and a higher top speed.
- 5 MINIMALISM': INNOVATIVE.** Shift Point Display, Brake Energy Regeneration and fully variable valve timing deliver maximum fun with minimum fuel consumption.

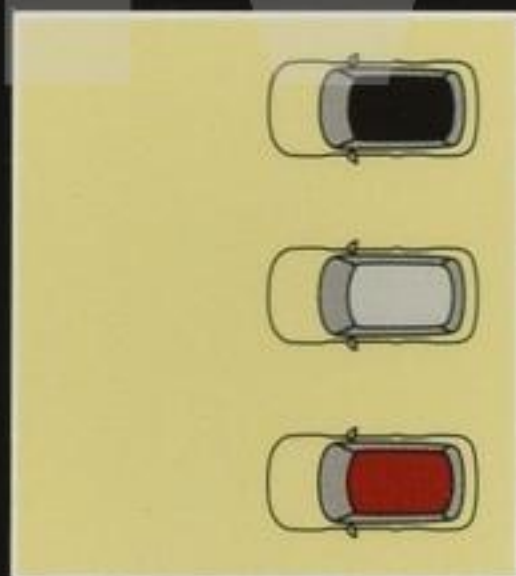

EXTERIOR COLOURS.

What does 8 x 3 make? The MINI design philosophy multiplies your scope for personalization: choose your favourite of the eight racy paint options, and then combine it with one of the three roof colours. And that's all there is to it.
