The Works Team was the name given to Cooper's own drivers racing in the 50s and 60s.

Today, the John Cooper Works tuning kit is the definitive addition for your MINI Cooper or MINI Cooper S. Fifty years of racing heritage and experience, coupled with the latest computer design and testing, have resulted in a tuning kit that takes an already quick and nimble car to new levels of driving.

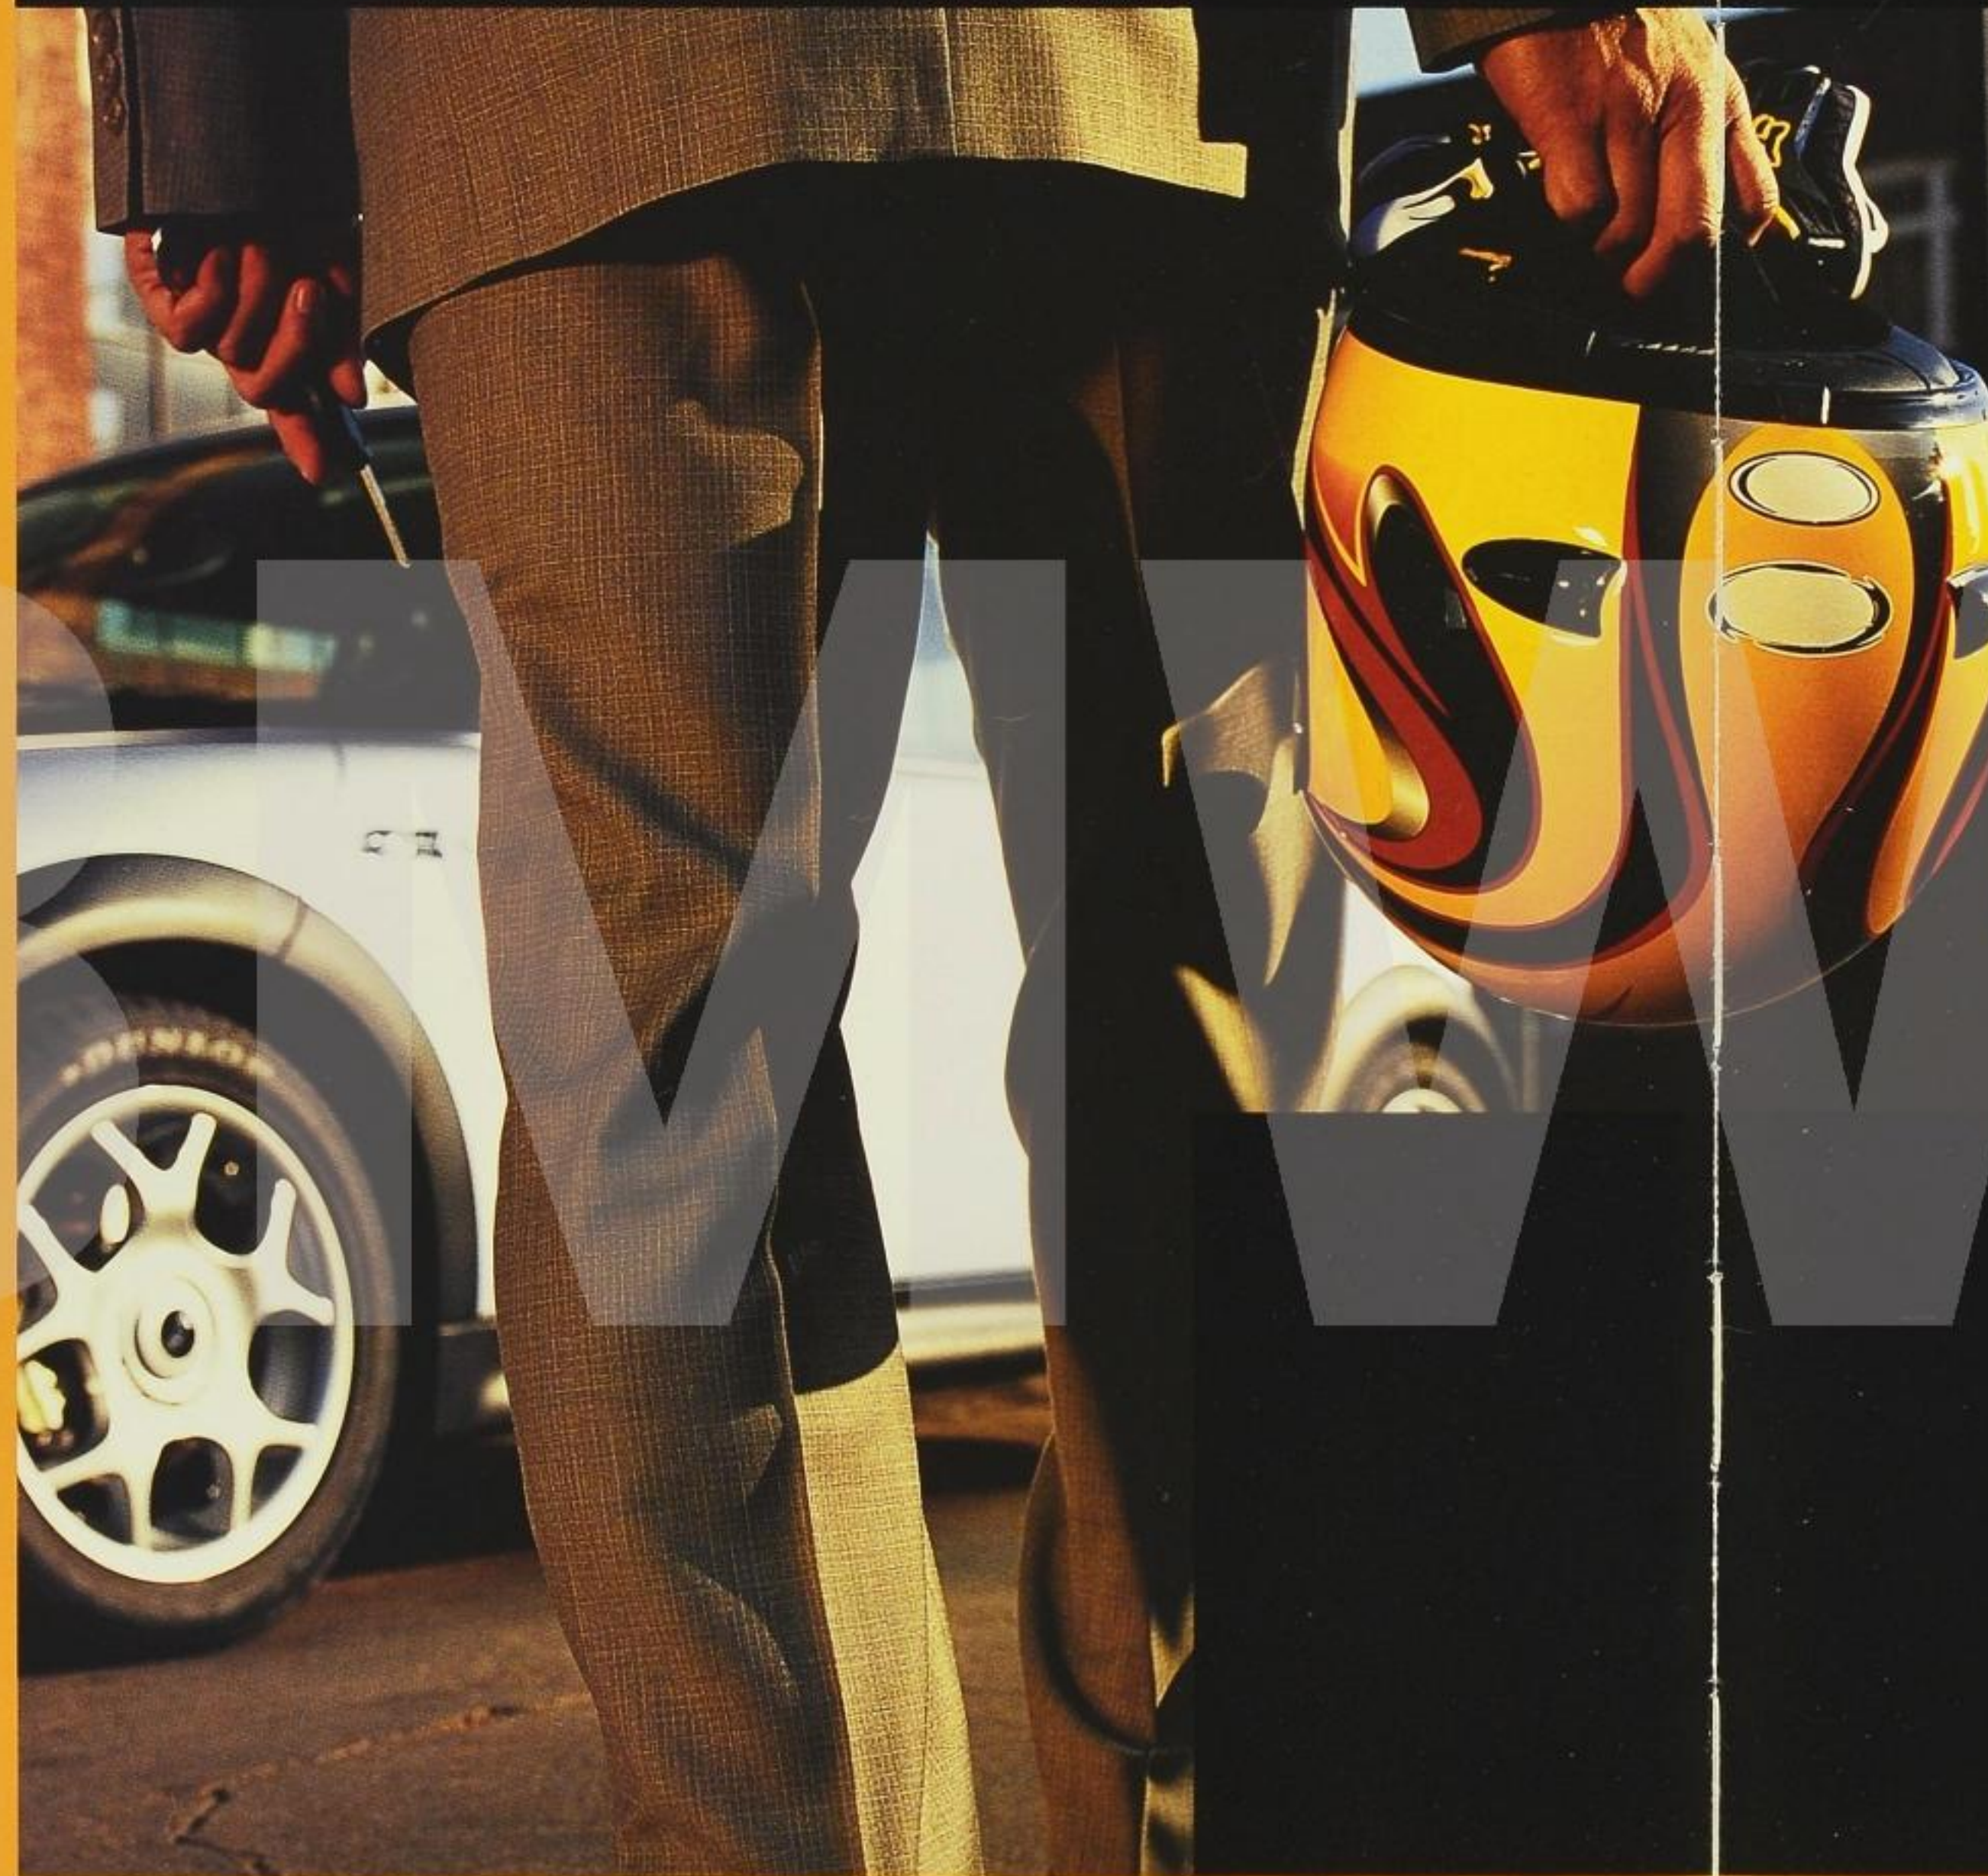

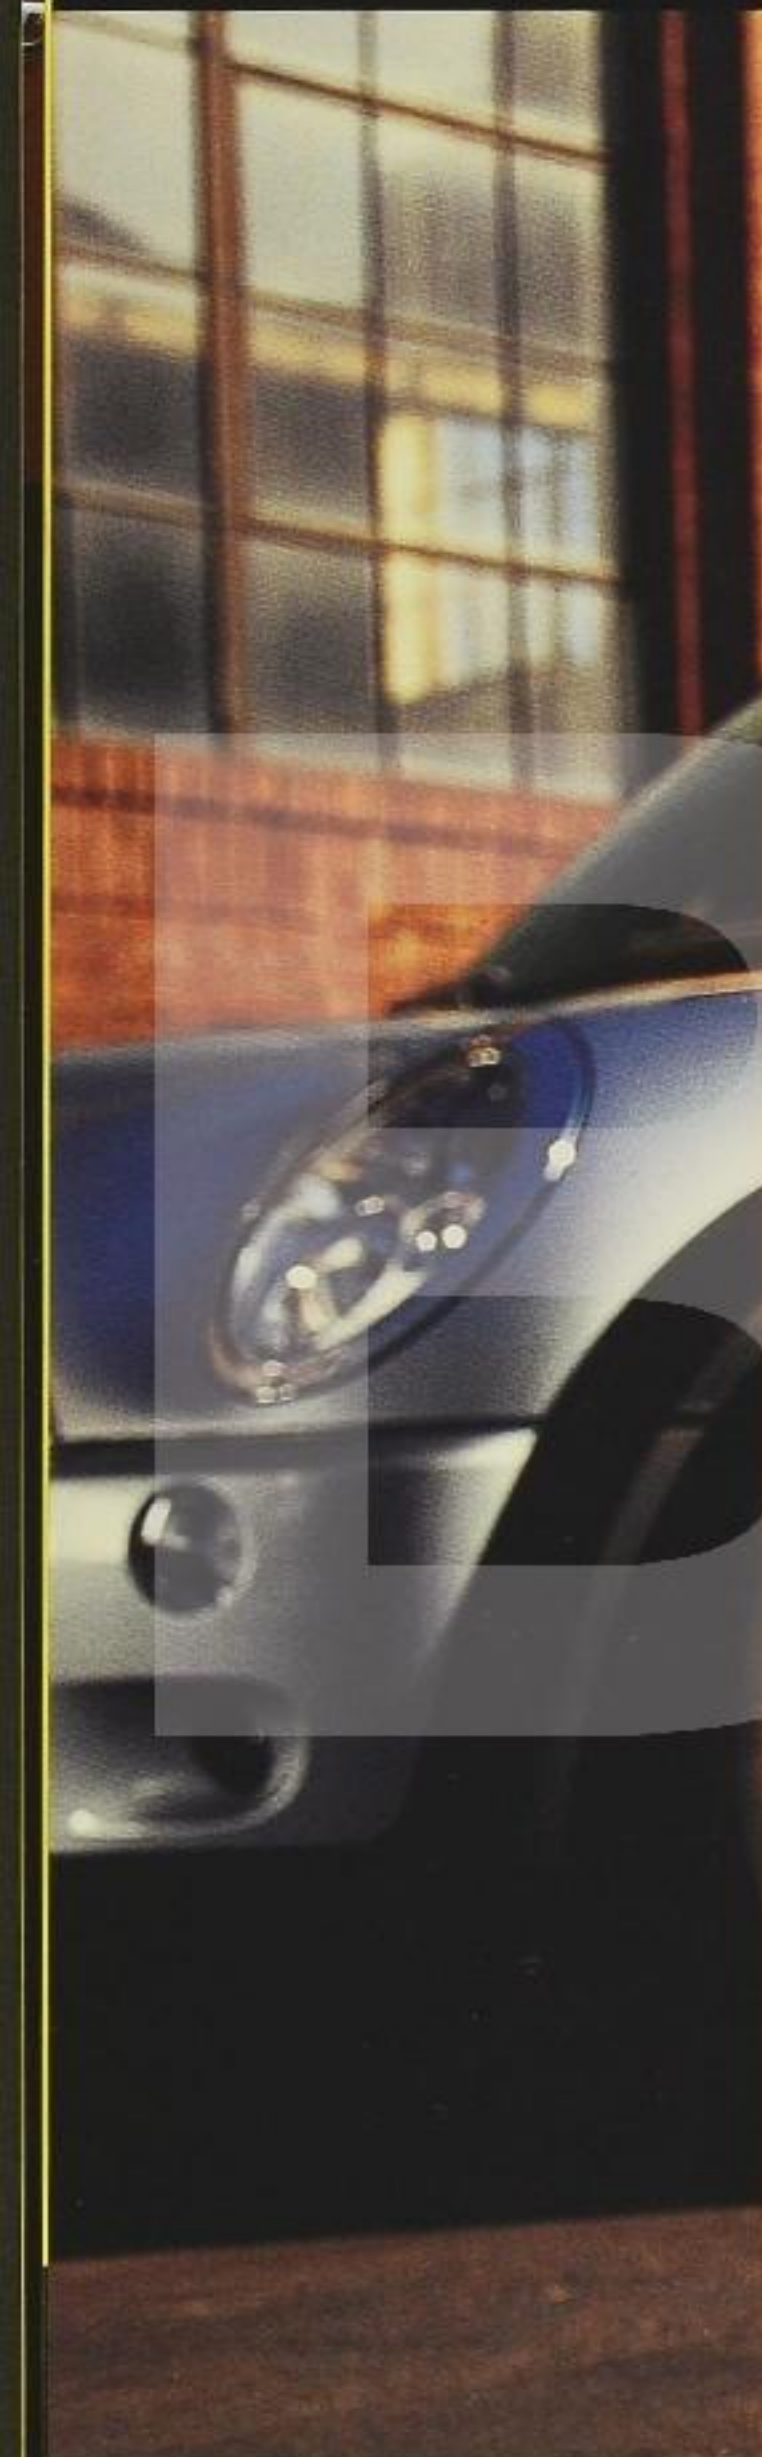

Each John Cooper Works component is an integral part of the whole kit. Matched and balanced, together they combine to deliver the breathtaking performance and handling that discerning MINI drivers love. Together with responsible fuel consumption, emissions and noise levels.

MINI CARRIES IT OFF.

All those useful extras for the active driver.
Bikes, skis, snowboards, luggage...

A selection of useful racks and carriers helps
MINI shoulder the burden without cramping your style.

1 Base support system

It's essential for any of the carrying options illustrated here. Holes may need to be drilled into the car's roof. When the roof base support system is removed, the caps supplied plug the holes. These can be painted to match your car's colour. Ask your dealer for a quote.
