# JUST TO BE ON THE SAFE SIDE.

## REINFORCED BODY

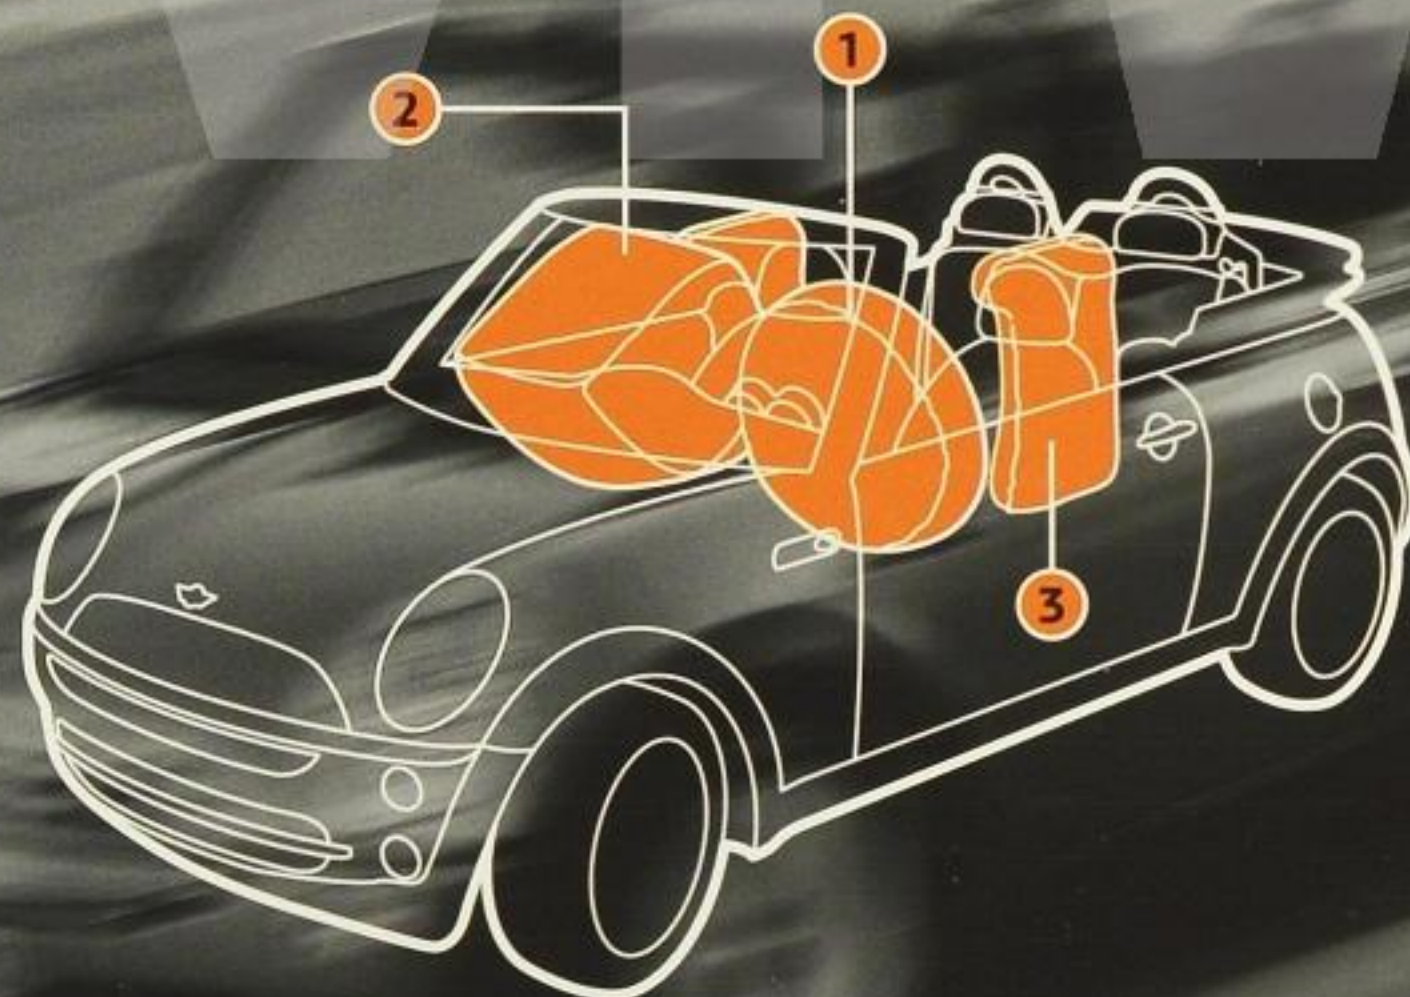

The side skirt area (1), doors (2), cross members and A and B-pillar areas are all strengthened. Additional V-struts link the rear axle to the body. The result is an exceptionally rigid body, making the car more fun to drive, and safer in the event of a crash. Rear passengers are further protected by a high-strength roll-over bar (3) behind the rear seats.

## DRIVER (1) AND FRONT PASSENGER (2) AIRBAGS

Fitted as standard, the driver and front passenger airbags protect the head and upper body in the event of a frontal impact.

## HEAD-THORAX SIDE AIRBAGS

Fitted as standard, the head-thorax side airbags (3) in the front seats significantly reduce the risk of injuries to the head, chest and pelvic areas in the event of a side-on collision.
