1

BMW AG

BMW

With its seductive contours, the MINI will move you before it ever turns a wheel. The array of added attractions includes generously sized wheels. With their unabashed aesthetic appeal, our premium-quality light-alloy wheels signal pure driving satisfaction while endowing your MINI with extra individuality – classic, modern or performance-oriented. But aesthetics are not everything. Custom wheels improve handling response. By increasing the flow of cooling air to the brake discs, they also promote a longer service life and reduce brake wear – all while meeting the highest quality standards.

1 R90 cross-spoke composite light-alloy wheels

With titanium bolts, size: 7 J x 17, for 205/45 R 17 tyres.

2 R90 cross-spoke light-alloy wheels

Size: 6.5 J x 16, for 195/55 R 16 tyres.

3 R83 5-star light-alloy wheels

Size: 6.5 J x 16, for 195/55 R 16 tyres.

4 R86 star-spoke light-alloy wheels

Size: 5.5 J x 15, for 175/65 R 15 tyres.

5 R84 X-lite light-alloy wheels

Size: 6.5 J x 16, for 195/55 R 16 tyres.

6 R81 7-lug light-alloy wheels

Size: 5.5 J x 15, for 175/65 R 15 tyres.

7 R88 double-spoke light-alloy wheels

Size: 6.5 J x 16, for 195/55 R 16 tyres.

8 R82 8-spoke light-alloy wheels

Size: 5.5 J x 15, for 175/65 R 15 tyres.

9 R85 5-spoke light-alloy wheels

Size: 7 J x 17, for 205/45 R 17 tyres.

10 R87 double-spoke light-alloy wheels

Size: 5.5 J x 16, for 175/60 R 16 tyres.

11 RUD-matic IV snow chains

High-quality snow chains, ready for mounting.

12 Mud flaps

Protect against dirt, gravel and road salt in the area adjacent to the wheel housings. Available for both front and rear wheels.

Wheel bolt locks (not ill.)

Customised internal socket design prevents bolt locks being unscrewed without special tool (supplied).

Numbers and letters – a MINI tyre glossary

A standardised code (e.g. 175/65 R 15 H) is imprinted on the sidewall of every tyre.

How to read this combination of letters and numbers:

175 – indicates the tread width in millimetres,

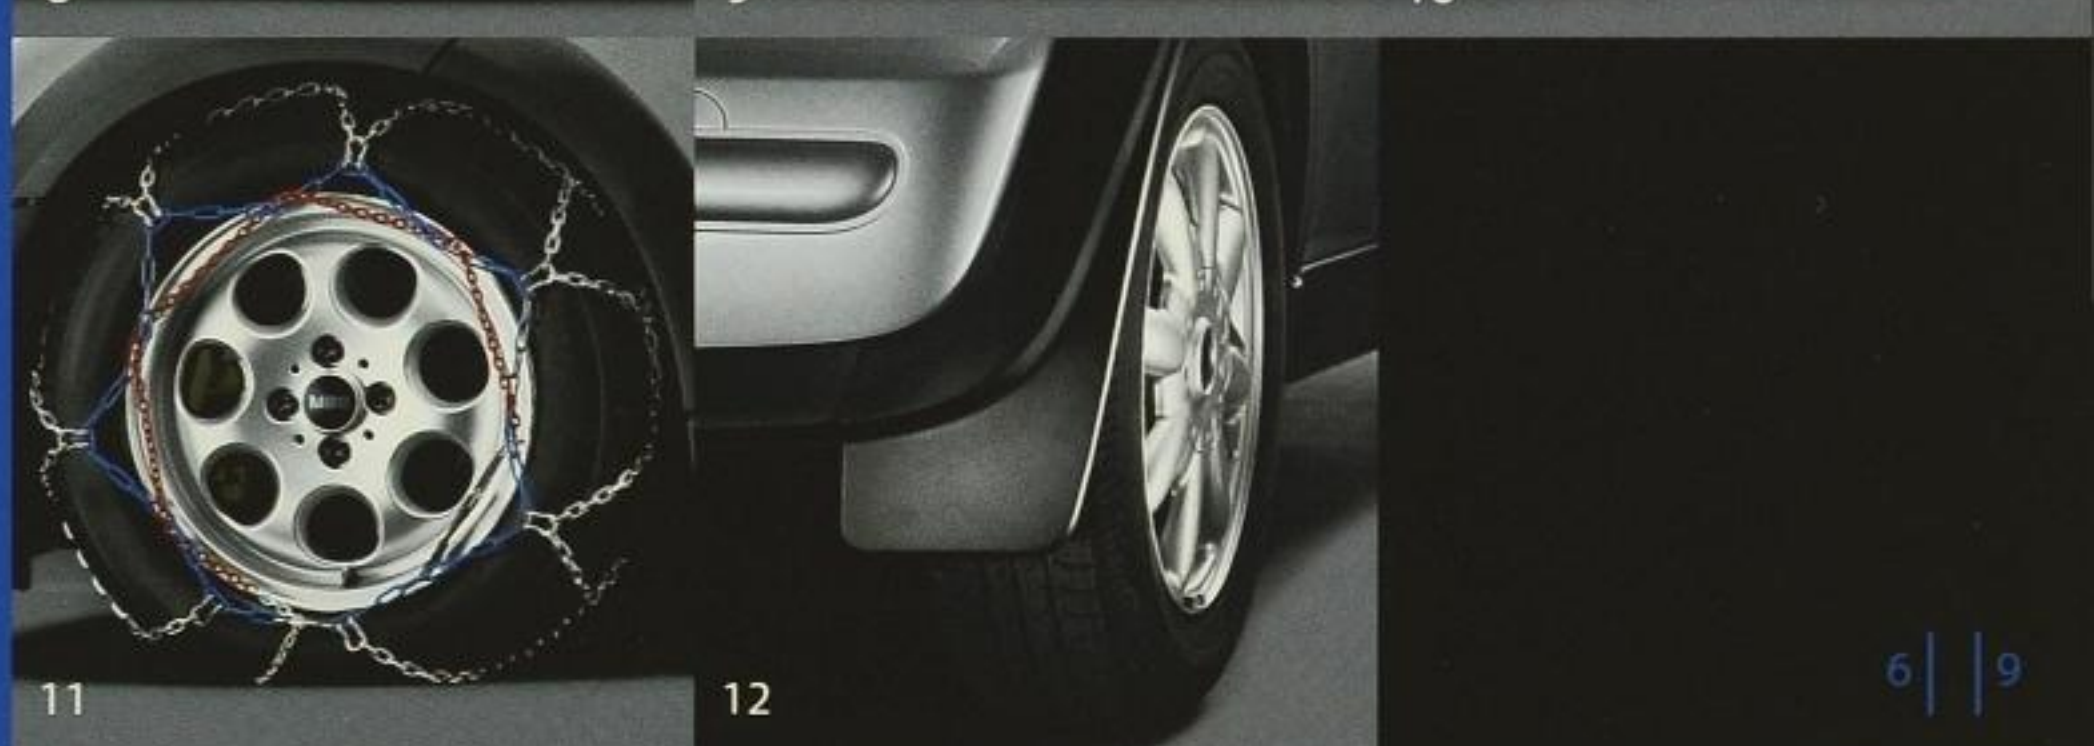

65 – the aspect ratio, indicates sidewall height as a percentage of tread width,

R – identifies the carcass structure's design, radial in this case,

15 – is the diameter of the wheel in inches,

H – indicates the tyre's rated top speed, in this case

H = max. 210 km/h.

4

Wide track, long wheelbase and direct steering – with its superbly responsive handling, the MINI Cooper S offers unexcelled driving pleasure. This personality is reflected in its appearance. Aerodynamic packages are available to endow the MINI Cooper S with even more sporting appeal. Since all parts are produced and painted to provide superb quality, care is easy. They always emerge from car washes with their glossy image intact. The driving performance and noise levels are also exemplary: the aerodynamics components have been extensively tested by wind tunnel. There is just one thing that cannot be determined by facts and figures: the impression that the aerodynamics package will have on you.

1+4 Aerodynamic Package and roof spoiler for the MINI Cooper S

The package consists of front and rear aprons, as well as side skirts in body colour and a custom grille in black. A colour-coordinated roof spoiler is available as an additional extra.

2+4 White lights

The entire tail lamp unit is in white, with reflectors in the bumper. This equipment is completed by the high-mounted brake light, also in white, and the white side turn indicators. There are also **Clear-Look bulbs** for the front white turn indicators, which only light up in yellow when they flash.

3 Auxiliary driving lamps

With their unique visual appeal, the chrome-trimmed auxiliary driving lamps offer the ultimate complement to the MINI's design. With their diameter of 150 mm, these round driving lamps form a compact and integrated assembly for mounting immediately forward of the grille. The lamps are wired to operate in parallel with your main beam headlamps.

4

1

1

2

Sport is one alternative that sometimes helps to keep your mind free after a strenuous day. The other: driving a MINI.

For example, when it is equipped with the electric folding roof. Just one push of a button is enough to give you all the light and fresh air you need to clear your head. Clarity also radiates from the aerodynamics package for the MINI One and also the MINI Cooper. This is thanks to its sporty simplicity and powerful appearance. Indeed, not only is the visual touch so strong, but all components comply with the most stringent requirements in crash safety.

1+2 Electric folding roof

The folding roof available on all models can be opened and closed in one movement using touch buttons. Two open positions can be programmed. The black folding roof is made from durable vinyl and features an anti-trap function. It is weatherproof, well protected against both the cold and heat, and suitable for an automatic car wash. An open folding roof (max. open position 640 x 620 mm) is the ideal way to enjoy the fresh air. Driving the MINI with the roof open is an extremely pleasant experience – the folding roof is equipped with an aerodynamic wind deflector, which ensures optimum air flow.

1-3 MINI Aerodynamic Package and roof spoiler

The package for the MINI One and the MINI Cooper consists of front and rear aprons, as well as side skirts in body colour and a custom grille in black. A colour-coordinated roof spoiler is available as an additional extra.

4 Chrome-plated exterior mirrors

The chrome-plated housing for the exterior mirrors emphasises their elliptical shape. This effect makes the MINI even more dynamic.

5 Chrome end pipe

Endows the back of your MINI One with an impressively sporting touch.

6 Sports rear silencer

The Sports rear silencer, which comes with a high-gloss end pipe, is made of stainless steel. Its extremely sporty look goes hand in hand with the powerful roar of the engine.

1

3

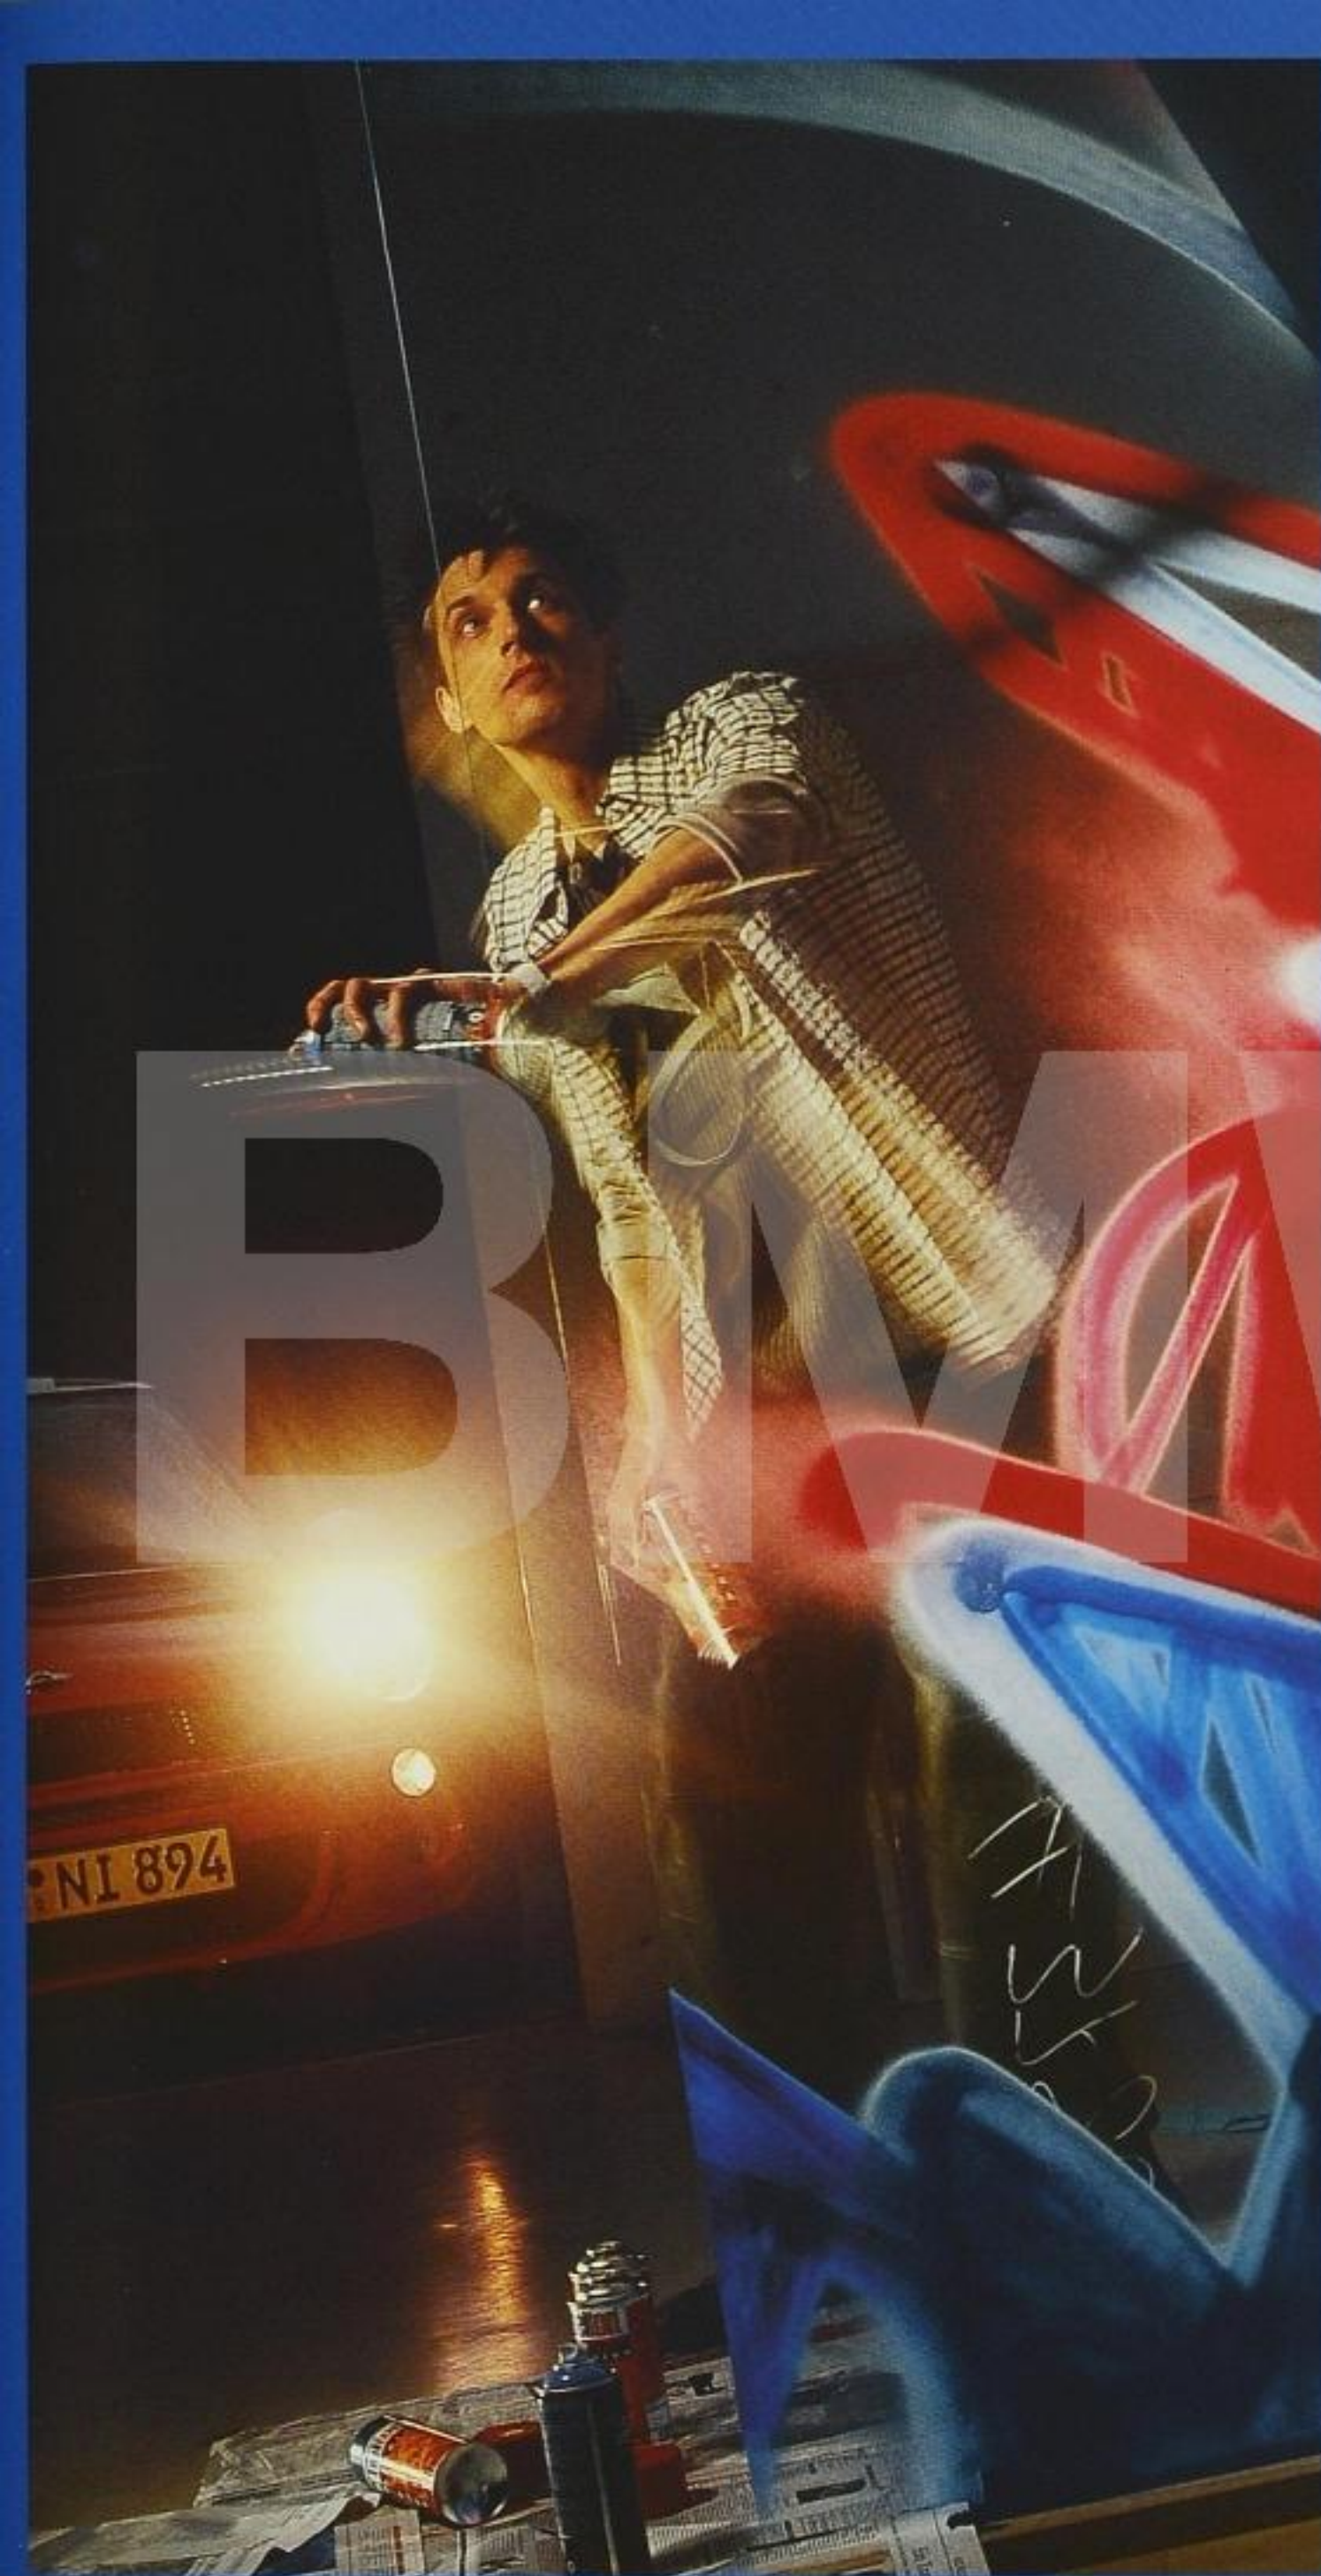

4

5

6

While the MINI is always the image of impeccable taste, there's still plenty of room to add a personal note. For example, fly your flag on the roof of your MINI One, MINI Cooper or MINI Cooper S. All flags display their own distinctive characteristics. These high-quality appliques are waterproof and abrasion-resistant. They do not, however, offer protection from covetous glances.

1 Union Jack

The Union Jack is a reference to the British MINI and its history of over forty years.

1 Bonnet-Stripes

Available in black or white, the Bonnet-Stripes exude an aura of motorsport and competition.

2 Chequered flag

The chequered flag looks sporty and lends your MINI a distinctive touch.

3-6 National flags

The MINI connects people who have the same preferences. Whether your dream country is Canada, the USA, Scotland or England, we have precisely the right one for you: the national flags for the MINI roof.

BMW

AG

YOU HAVE A MIND OF YOUR OWN. YOU DEFINE YOUR OWN STYLE – WITH MINI INTERIOR ACCESSORIES.

1

2

1 Multifunction steering wheel

You can operate the cruise control and sound system using buttons integrated in the steering wheel.

1 Onboard computer

Integrated within the rev counter just above the steering column. The information offering includes average speed and fuel consumption, cruising range, outside temperature, time and date.

2 Stainless steel foot rest

Underlines the MINI's sporty character.

3 Rev counter for MINI One

Display of the current engine speed makes an economic driving style possible and helps to protect the engine – when the engine is cold, for instance.

The MINI is fascinating from every perspective. With its seductive lines, capacious interior, and a broad range of optional accessories, you are spoilt for choice. Polished steel, chrome or leather – the exciting and perfect variety of materials will appeal to your senses.

4 Handbrake grip, chrome

The ideal complement to the MINI's modern interior.

5 Auxiliary battery voltage and oil temperature gauges

The battery voltage and oil temperature gauges provide information about the condition of the electrical system and engine respectively. These round instruments (52 mm in diameter) complement the design of the dashboard's air outlets.

6 Selector lever grip, leather/chrome

A merging of contrasts: cold chrome and supple leather create a unique world for your own pleasure.

7 Selector lever grip, chrome

With the chrome design, every touch is a pleasurable experience.

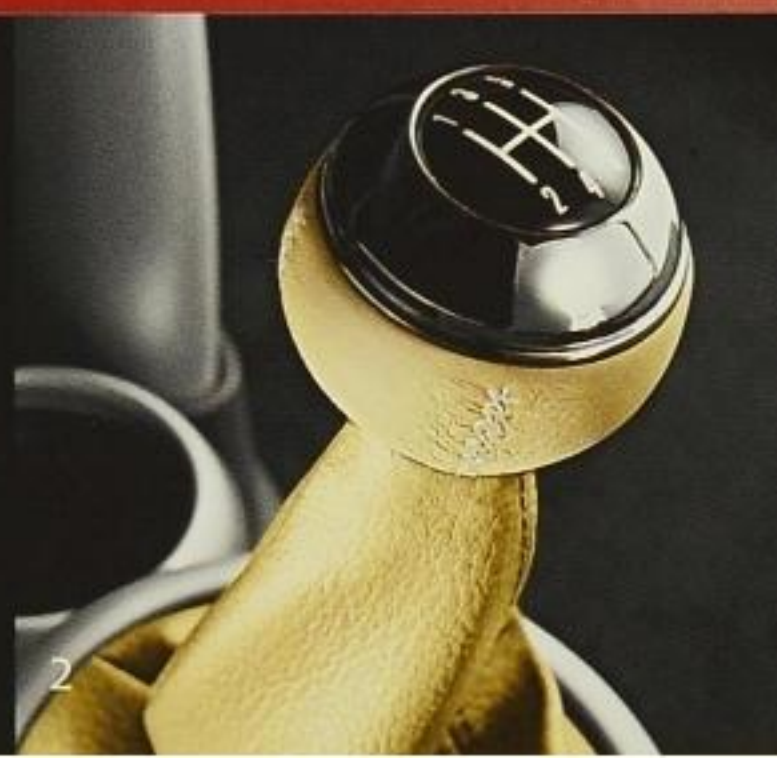

1

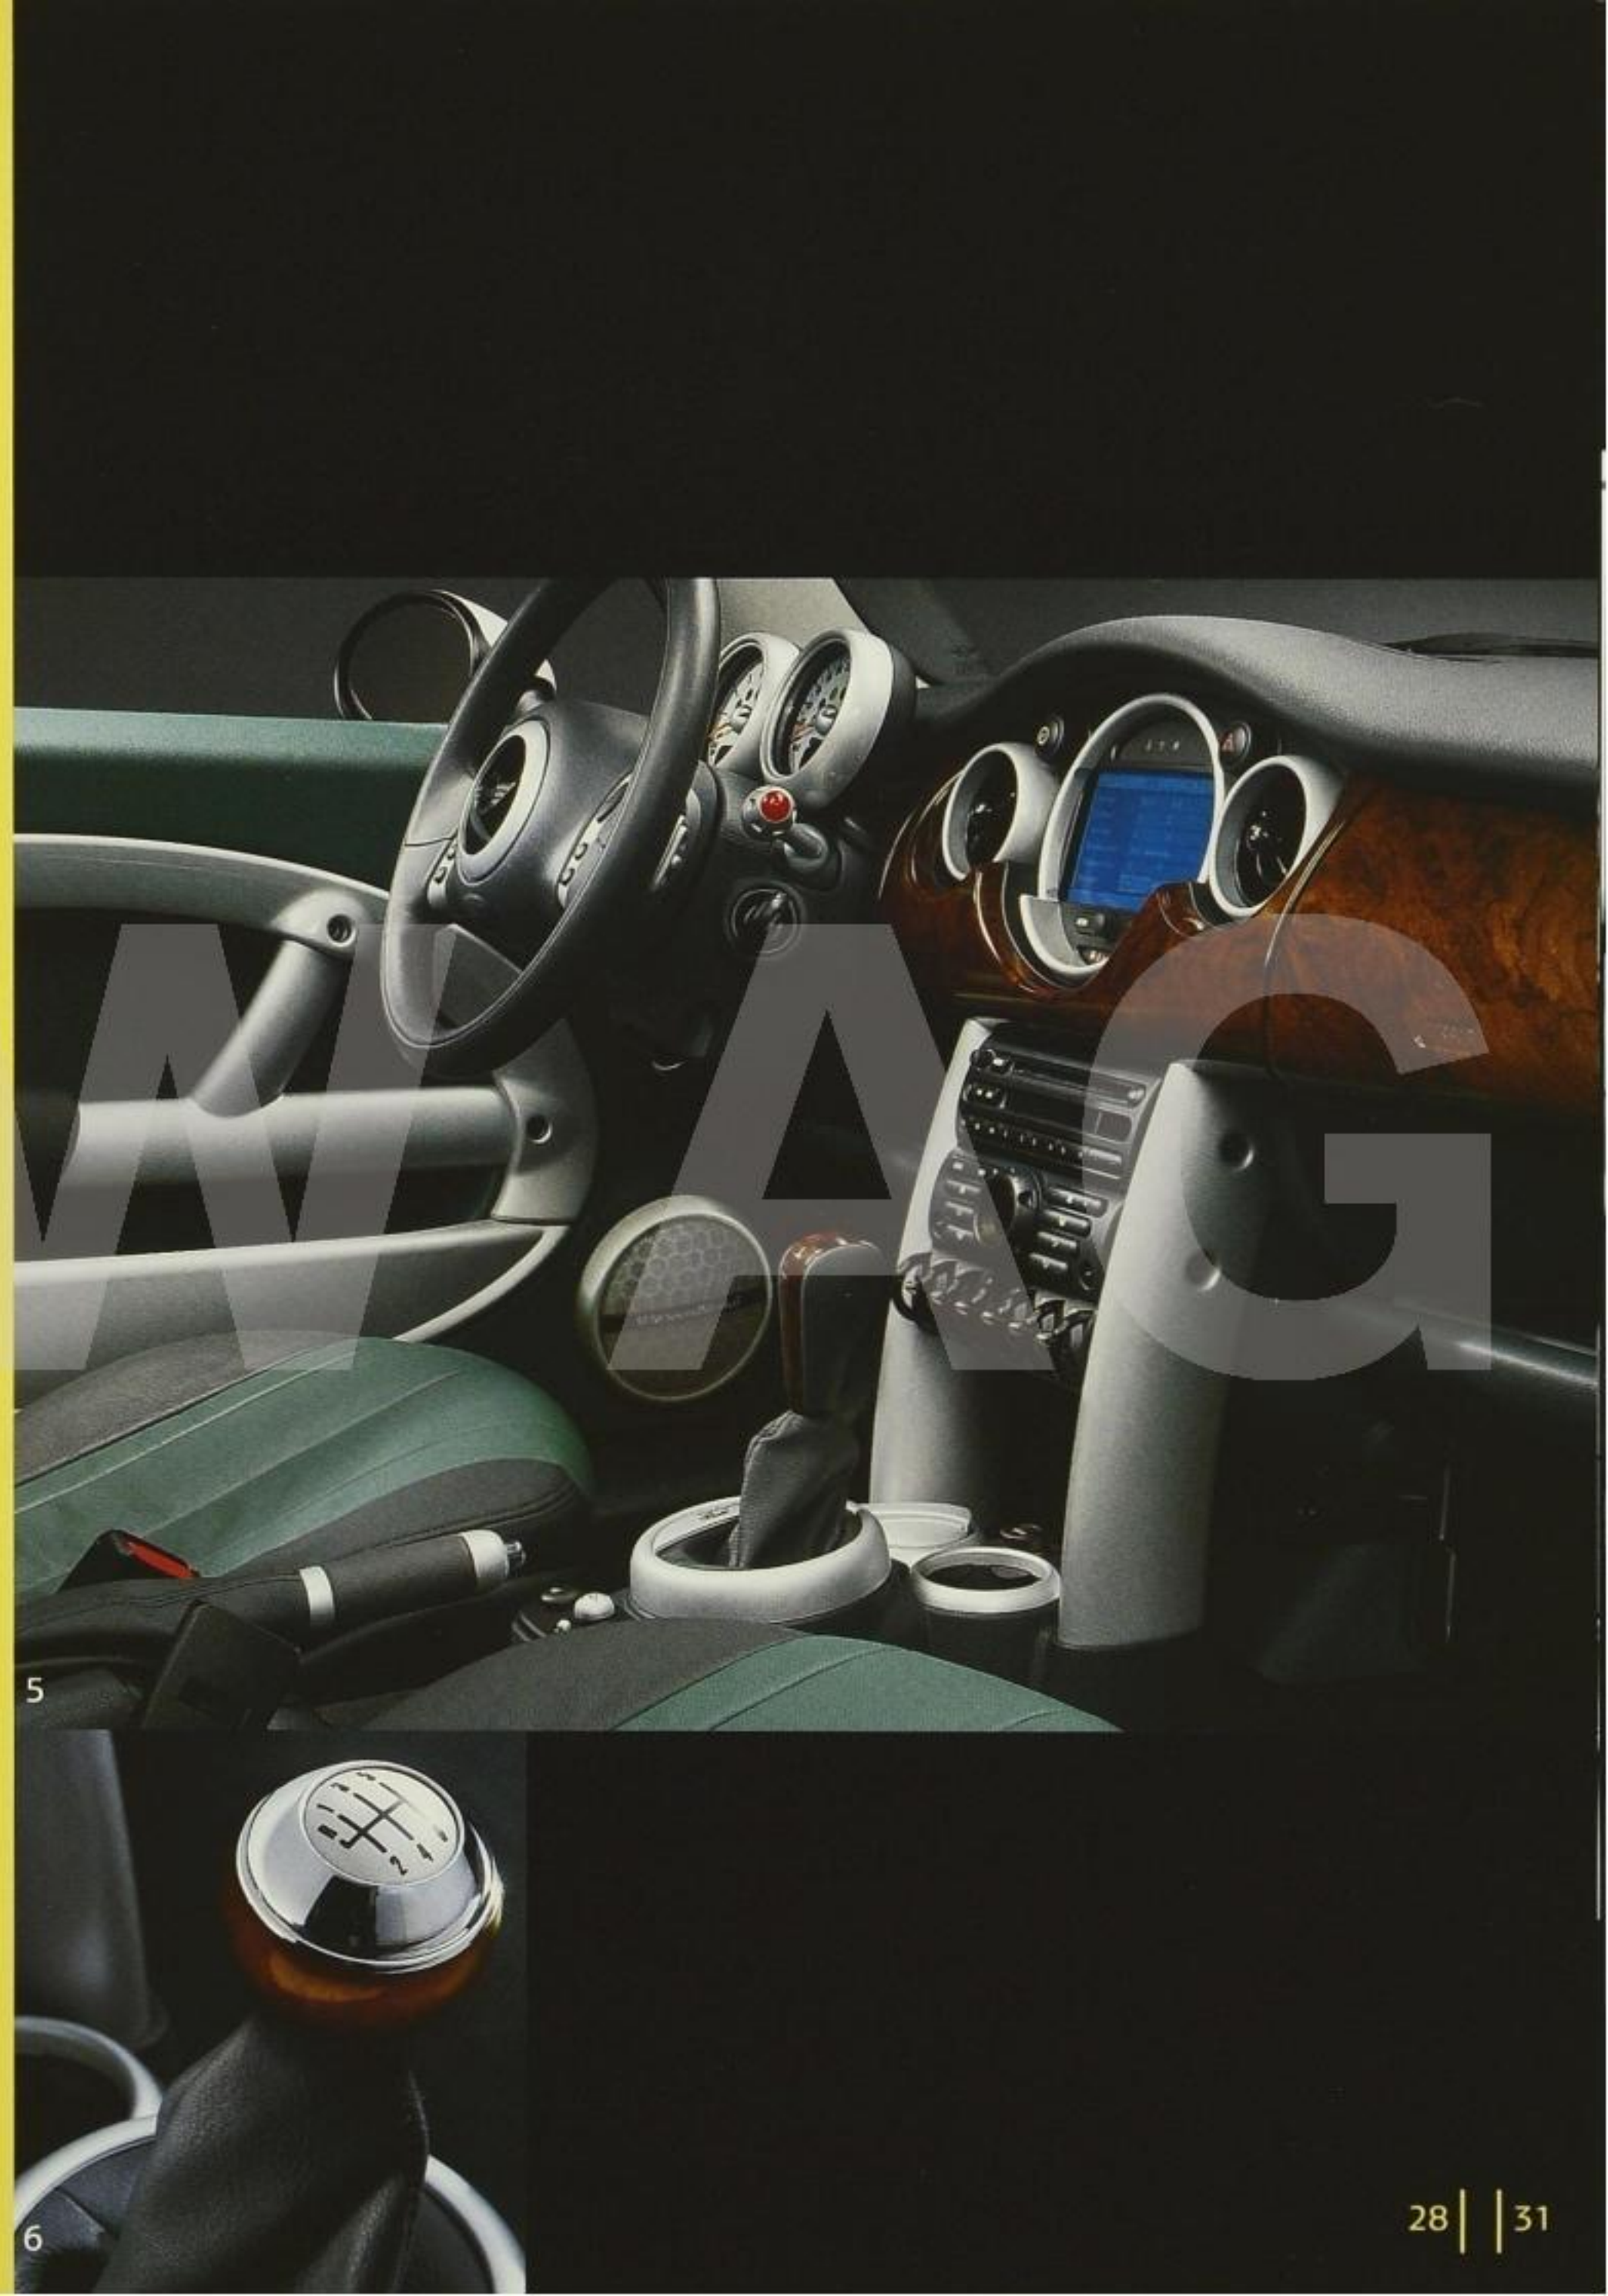

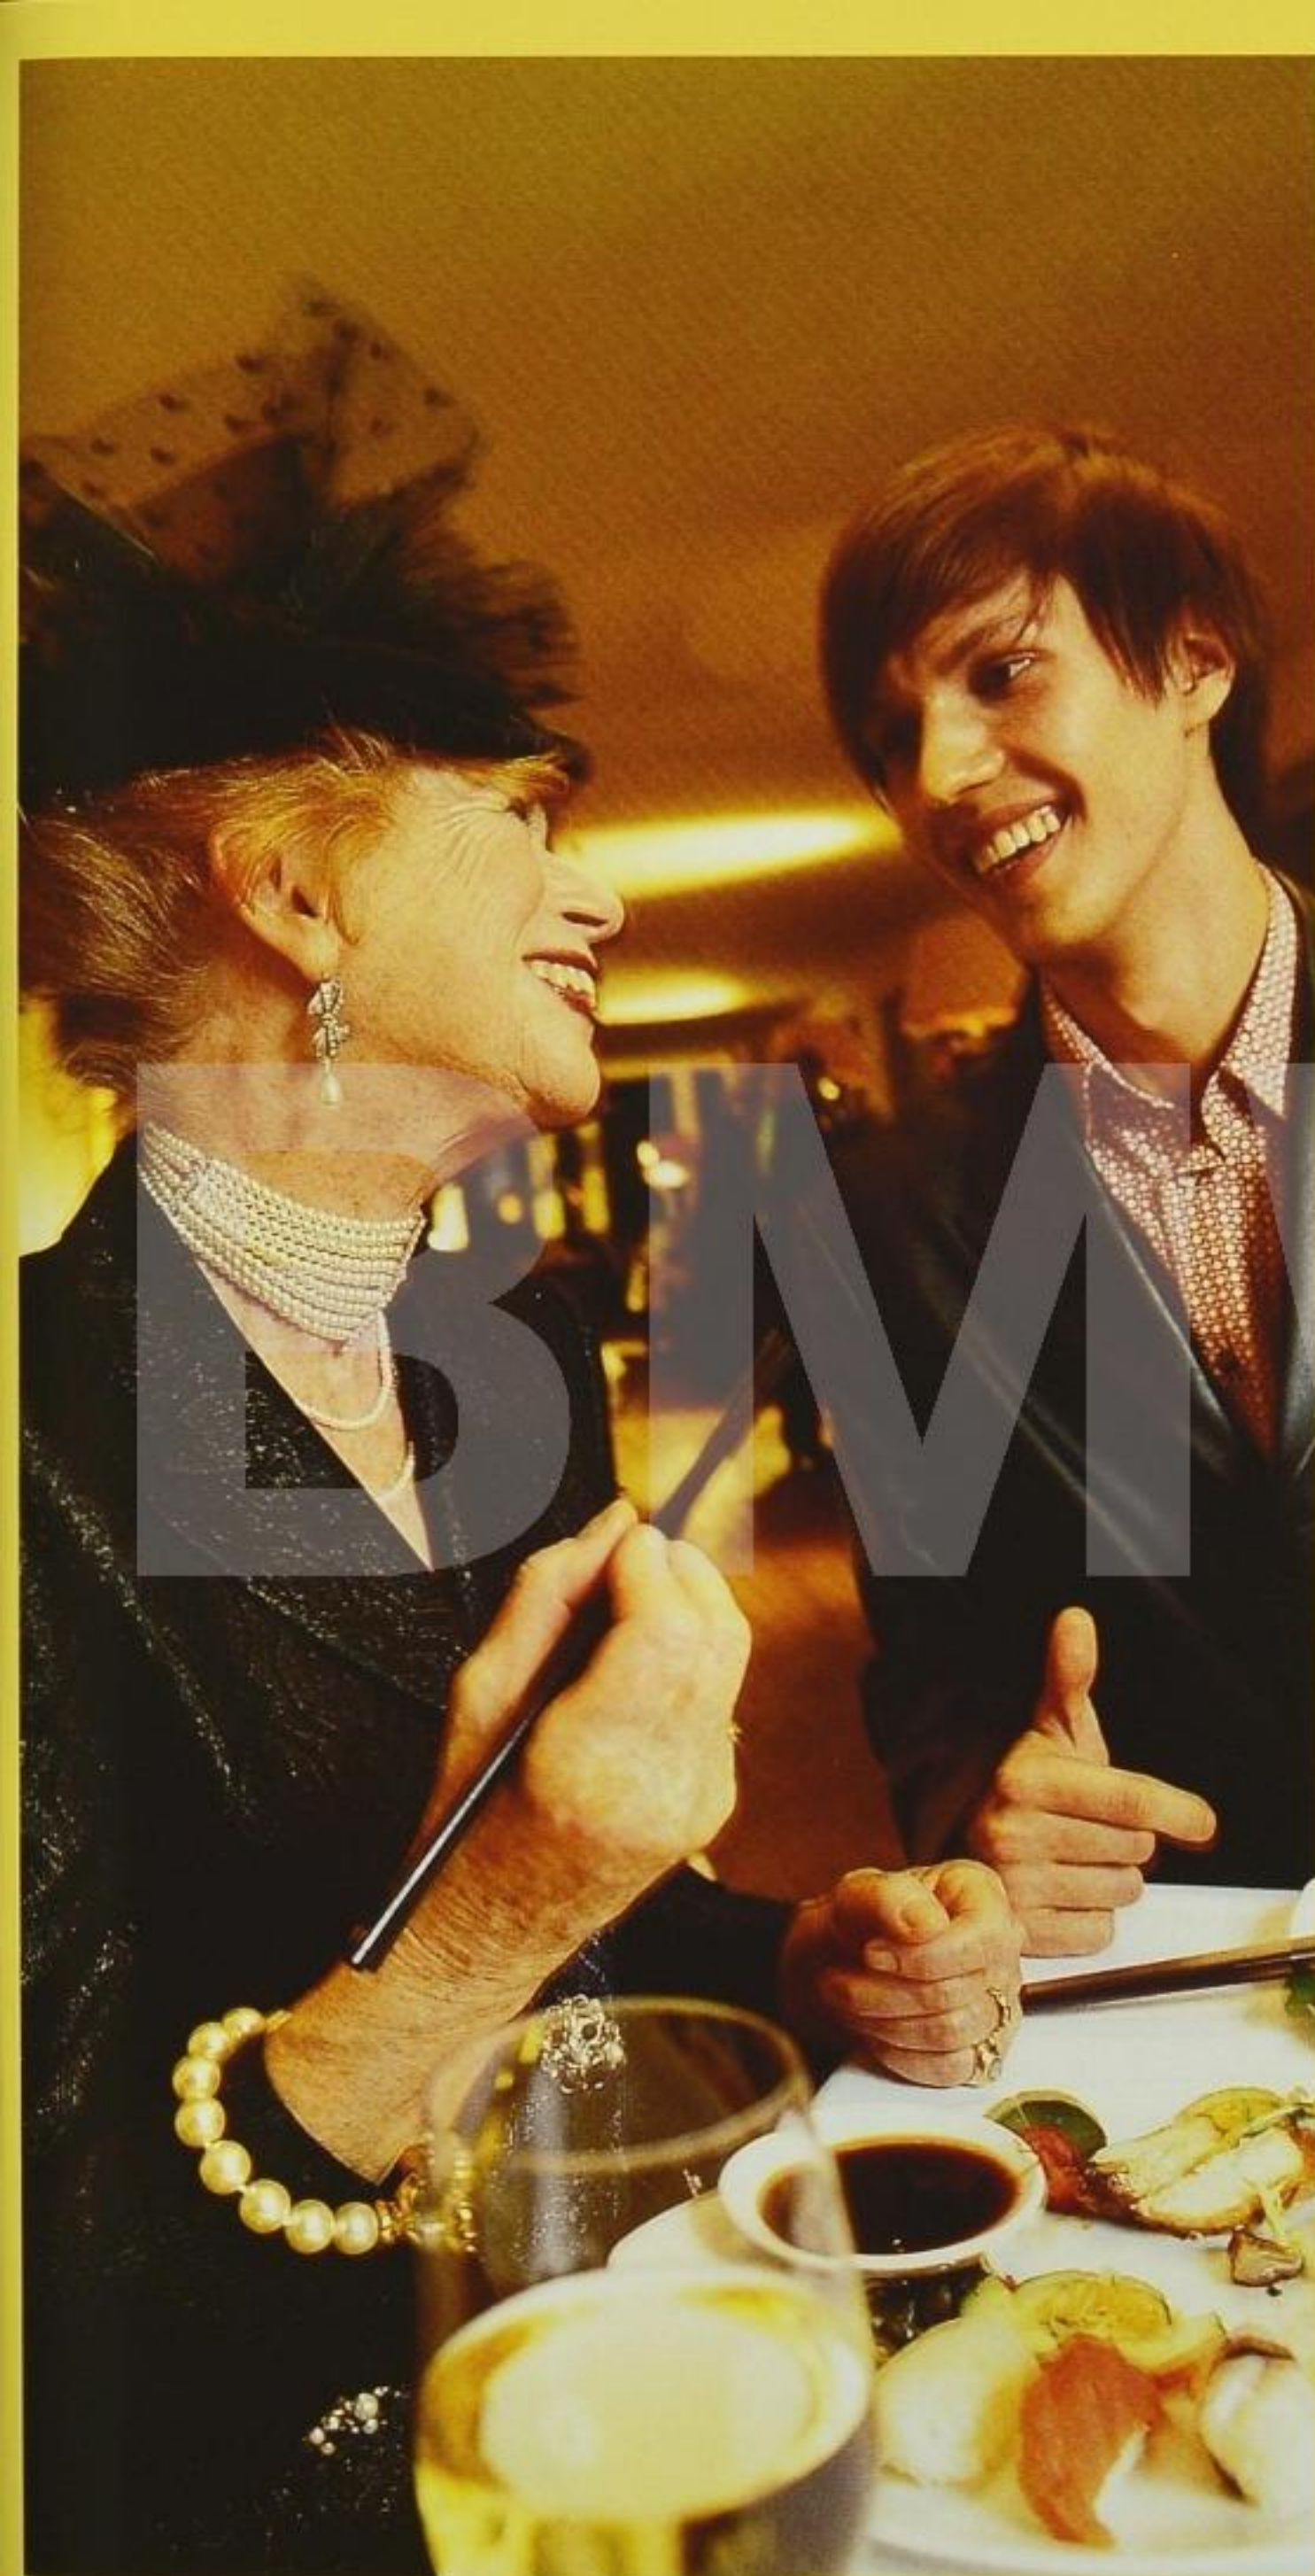

4

2

3

Choosing a MINI is a completely conscious decision. Because its shapely design and attention to detail are an inspiration – especially with the wide variety of optional equipment for the interior. The various leather trims also give a special sense of well-being. For example, the supple leather steering wheel and gear lever knob are a pleasure to touch, and the impressive colours a delight for the eyes. What does it feel like? You'll find out.

1 Leather seats

Carefully tanned and exceptionally supple – an important quality feature of the MINI's leather interior.

1-4 Leather accessories, in selected colours

Even more fun driving the MINI with supple leather for a firm grip – available in Panther, Cordoba, Emerald or Lapis.

Panther leather (fig. 1)

Leather steering wheel rim, handbrake grip and gaiter, gear lever knob and gear lever gaiter. Selector lever grip and gaiter (not ill.).

Cordoba leather (figs. 2+3)

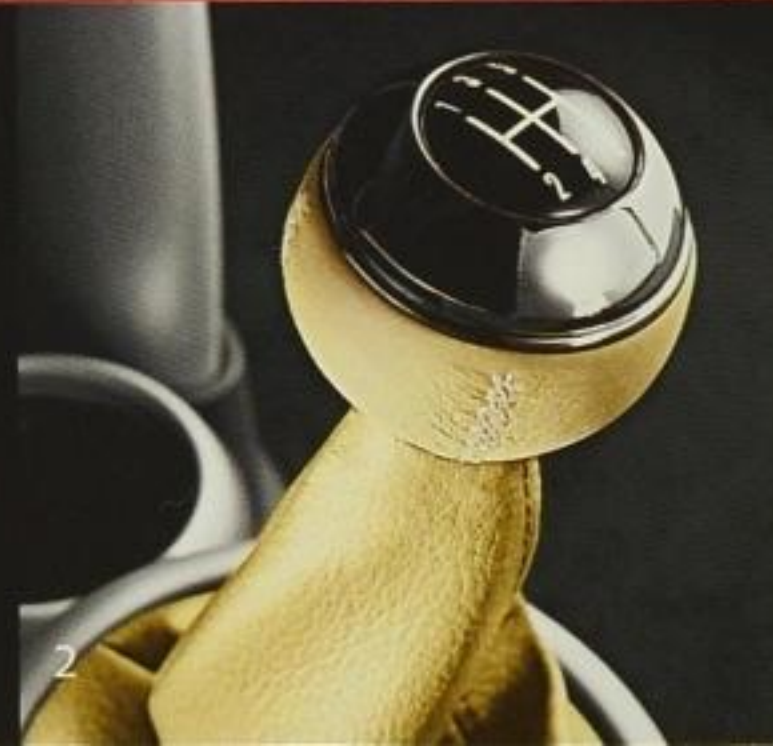

Gear lever knob, gear lever gaiter, leather steering wheel rim. Handbrake grip and gaiter, selector lever grip and gaiter (not ill.).

Emerald leather (pages 22/23)

Leather steering wheel rim, handbrake grip and gaiter, gear lever knob and gear lever gaiter. Selector lever grip and gaiter (not ill.).

Lapis leather (fig. 4)

Exclusive to the Cooper S, gear lever knob and gaiter. Handbrake grip (not ill.).

5 Interior wooden decor trim

The interior of the MINI with selected wooden accessories has a classic appearance. The dashboard has a particularly eye-catching style.

5+6 Fine wood selector lever grip or gear lever knob

Burr walnut. Enriches the MINI's interior with elegant detail.

5

6

1

2

3

4

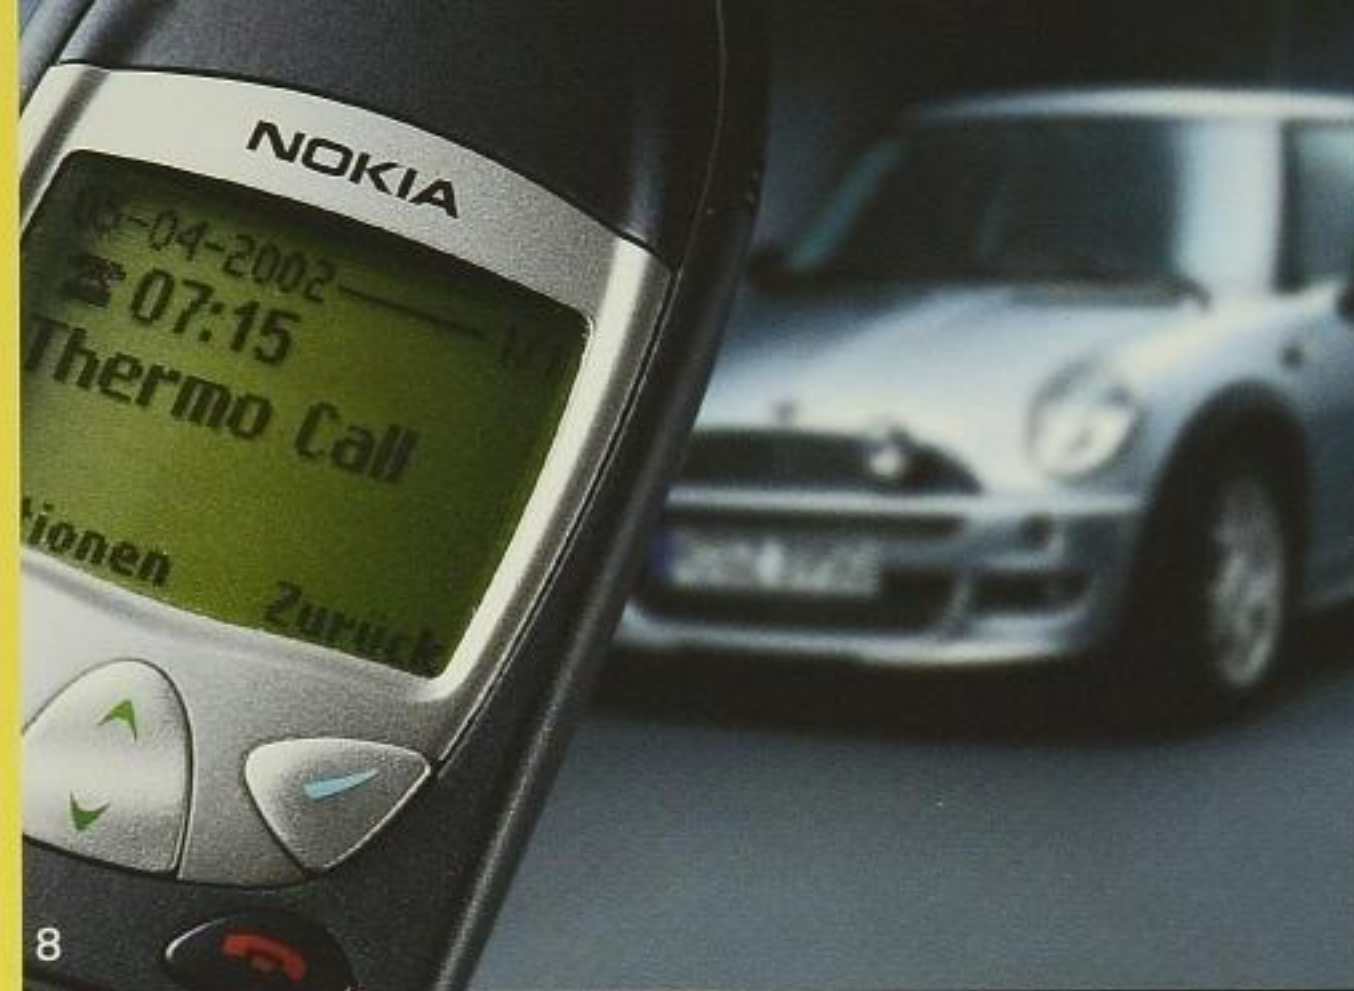

5

6

7

1 Sport seats

The moulded cushions with their custom side bracing offer you a sensation of added safety, especially on winding roads. Backrest angle and cushion height can be adjusted separately to supply an optimal fit for every individual.

2 Backrest-mounted map pocket

Offers additional storage in the rear.

3 Seat covers

These protective seat covers in anthracite-hued flat weave are precision-tailored for an exact fit. The stretch-resistant upholstery covers have been designed to mirror the MINI's characteristic charm.

4 Seat heater

The heated backrest and cushion start to exude warmth and well-being in just a matter of minutes. Two-level regulation.

5 Velours footmats

Premium-quality soft velours.

Although it handles with the precision of a kart, the MINI is a genuine four-seater. Available with an array of optional accoutrements that go way beyond standard fare. One example is an auxiliary heater with Thermo Call, which ensures that you receive a warm welcome when you enter the passenger compartment on wintry days. Something else that won't leave you cold: Each accessory is custom-designed to reflect your exact requirements.

6 City footmats

This high-quality design in close-weave velours resists water and stands up to abrasion. Every footmat features the MINI emblem.

7 Rubber footmats

With raised step section – to protect your shoes.

8 Parked-car ventilation/Auxiliary heater

The parked-car ventilation system allows you to look forward to a comfortable atmosphere when you get in on warm summer days. The system replaces the stuffy inside air with cool outside air before you set off. The auxiliary heater preheats the engine's coolant circuit to reduce wear and increase fuel economy. This can be programmed using the **preset timer** and can be switched on and off by **remote control** from a distance of up to 600 metres. With the **Thermo Call system**, it can be activated from anywhere by landline or mobile phone.

9 Automatic climate control

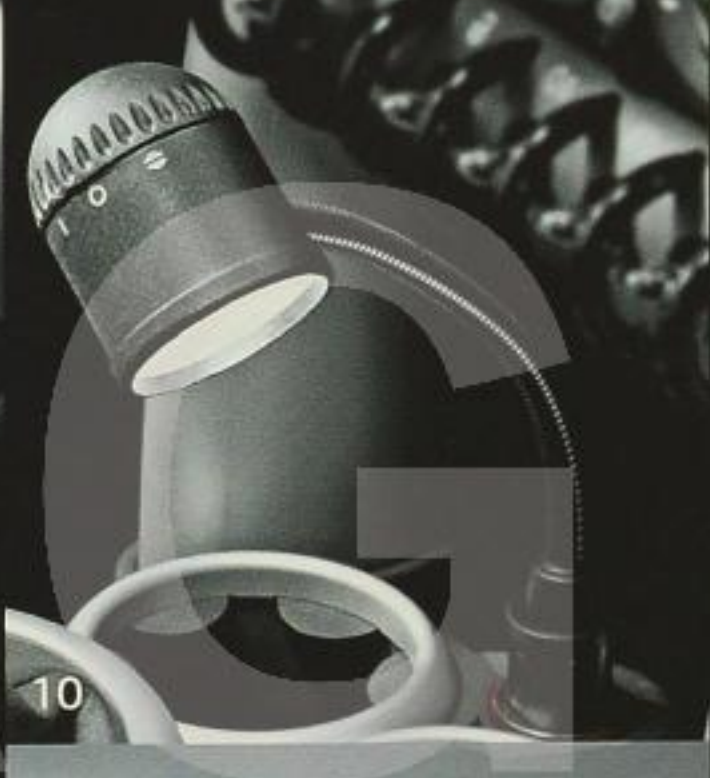

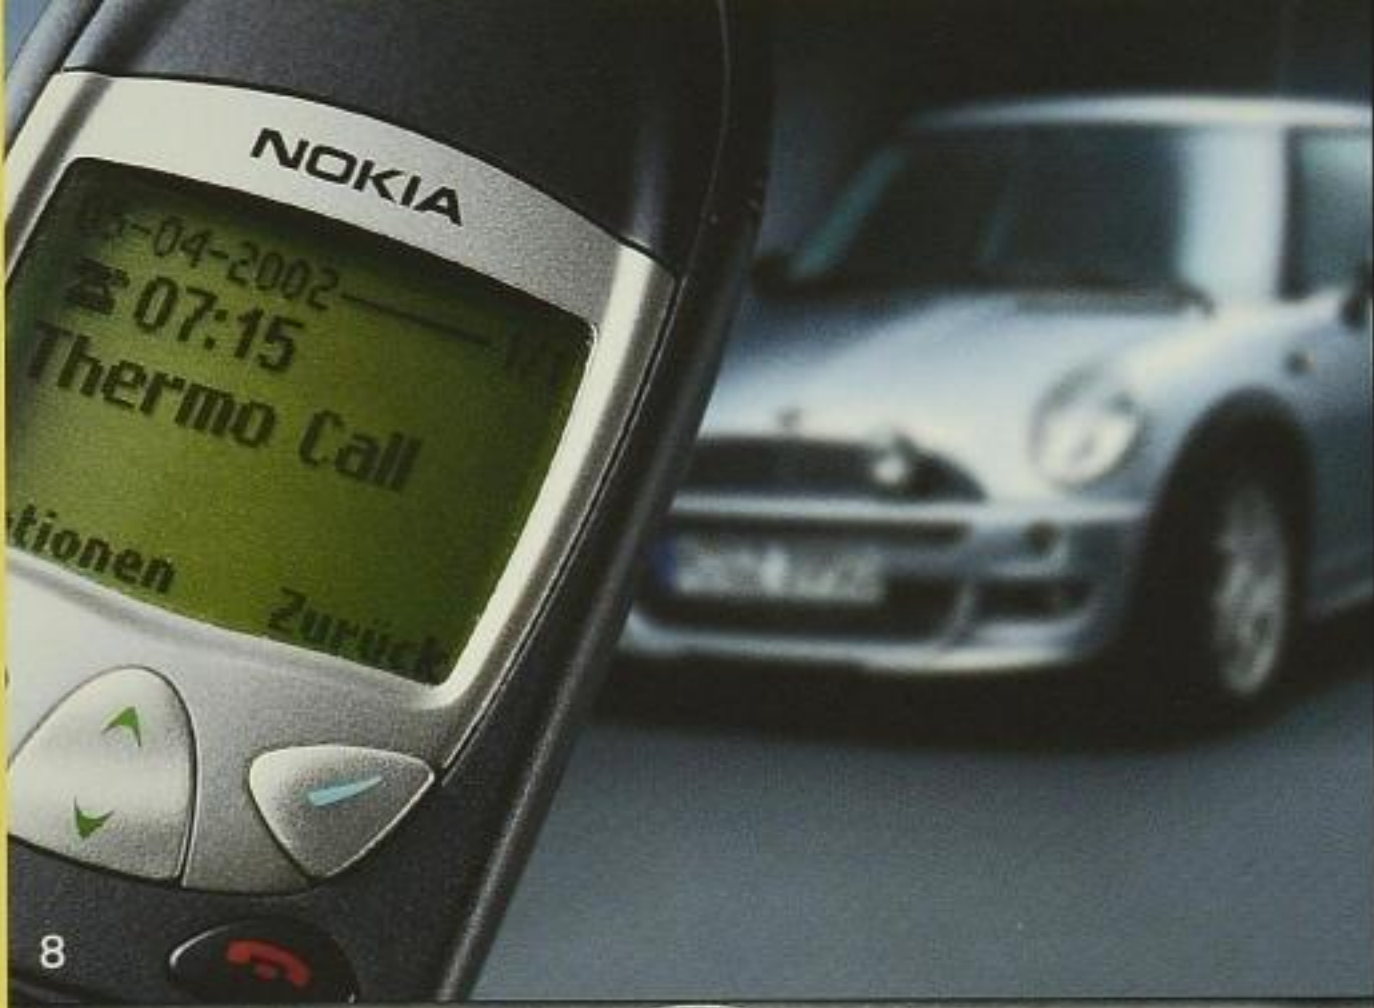

The automatic climate control dials in the desired interior temperature with minimal delay and then maintains it at the pre-selected level. You can select airflow rate, air distribution pattern and temperature (to the exact degree) at the touch of a button, or you can adjust the system manually.

10 Halogen reading lamp

Glare-free light. You can adjust the light beam to shine in any direction desired.

11 Sunblinds for rear and side windows

This foldable sunblind is attached to the rear and side windows. It can be carried in the car in its slip case when not in use.

IT'S IMPOSSIBLE TO BE
EVERYWHERE AT THE SAME TIME.
YET IT IS POSSIBLE TO BE KEPT
INFORMED USING THE BUILT-IN
COMMUNICATIONS SOLUTIONS
OF THE MINI ACCESSORIES.

In the MINI, you can be as mobile as you wish. Use the radio navigation system to be sure you arrive at your destination. Or the new PDA integration, which quickly informs you about all that you are really interested in. The possibilities are almost limitless – there are four development phases: communications, navigation, MINI Assist and entertainment. What are you still waiting for? Enter the world of MINI communications and at the end of your journey you probably won't want to leave.

1-5 PDA integration

The PDA (Personal Digital Assistant) starter kit comprises a holder which holds your Compaq unit in landscape format. This is located centrally above the speedometer, in an excellent position within the driver's field of vision and area of operation. It has a central unit with charge electronics, a bracket for memory extension cards and the specific MINI PDA software.

Telephone/SMS

Using the telephone console for your mobile phone and the data-compatible mobile phone, you can conveniently make calls in this development phase via your PDA, use SMS services and use the addresses stored in the PDA, for example.

Navigation

Use this development phase to find your destination reliably and quickly. The onboard navigation system guides by map or symbol display. Combined positioning systems (GPS, yaw rate sensor and speedometer signal) accurately determine your position. In the case of a traffic jam the system provides an alternative route on the touch of a button. The scope includes CD-ROM map materials of Europe.

MINI Assist/MINI online

MINI Assist provides comprehensive information en route. Information on the location of petrol stations, restaurants and hotels, for example, can be sent via SMS and displayed on the PDA. The emergency call function (automatic when an airbag is triggered or manual at the touch of a button) sends information on your location to an emergency call centre. It also provides information on current traffic conditions. The MINI online services include weather information, current news, telephone information, directories, travel information, duty chemist schedules, parking information and city guides as well as other information. You can also receive e-mails and access addresses and phone numbers from your personal address book.

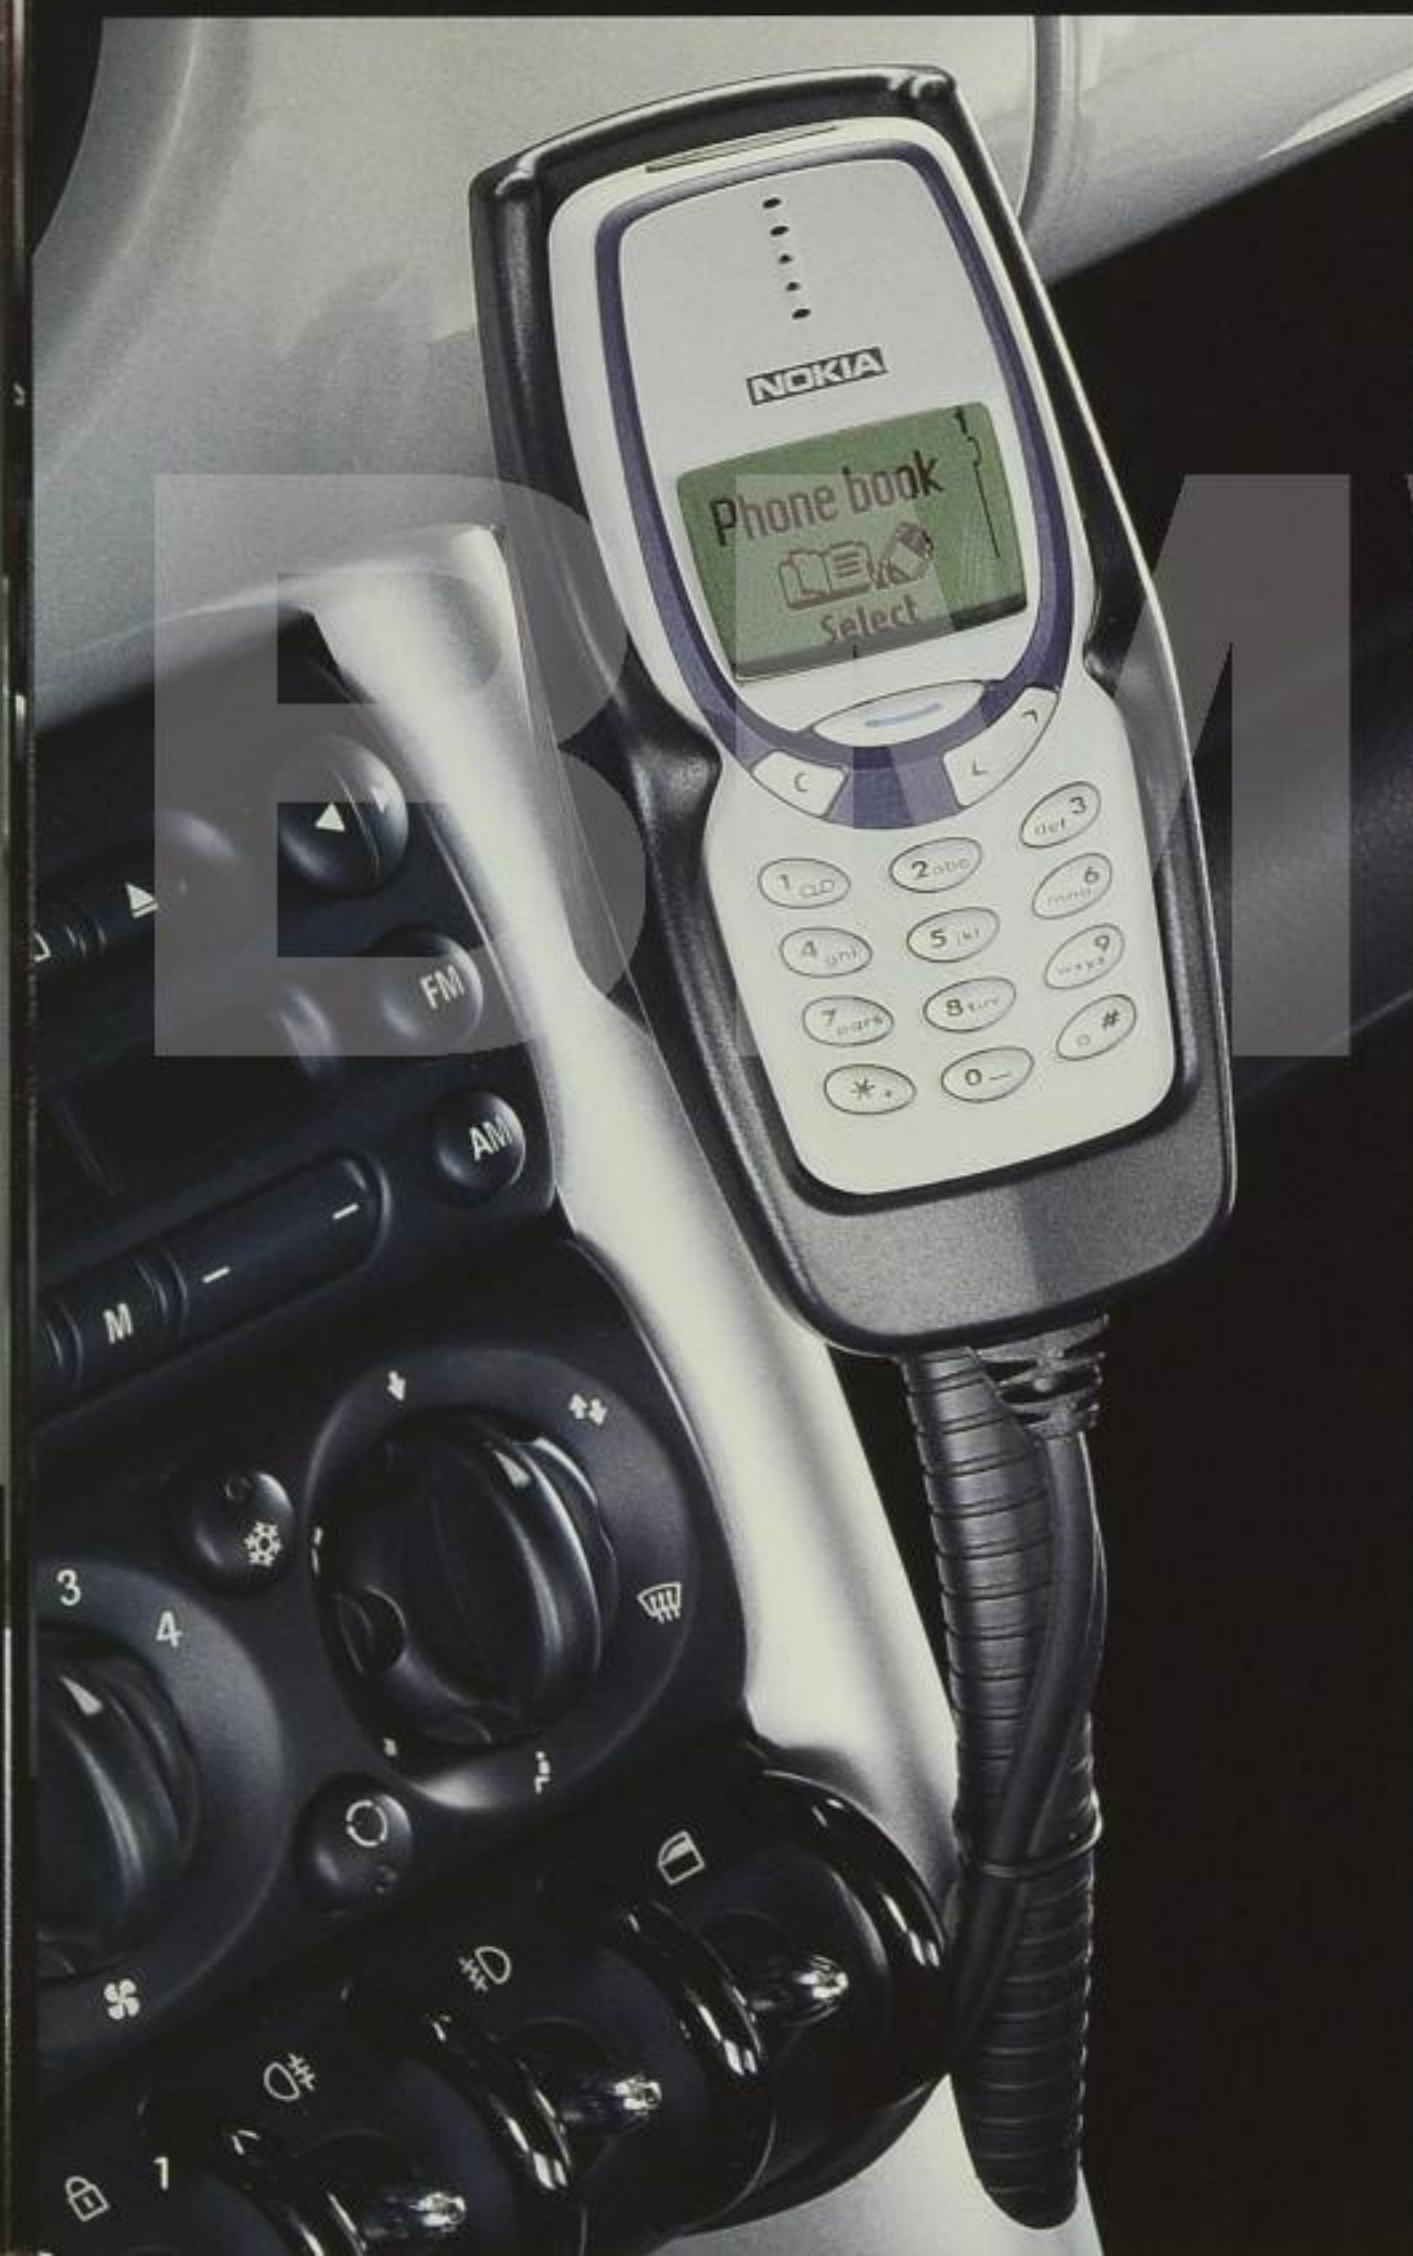

Entertainment

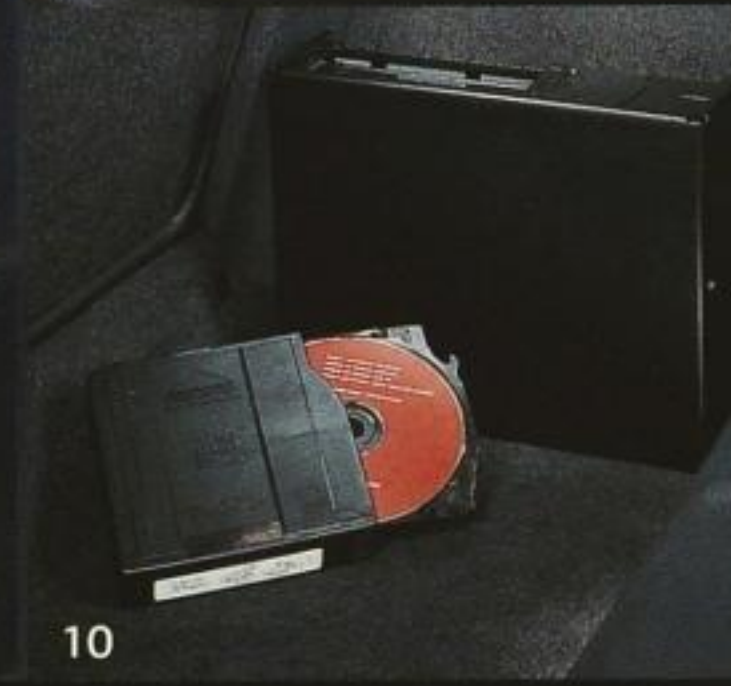

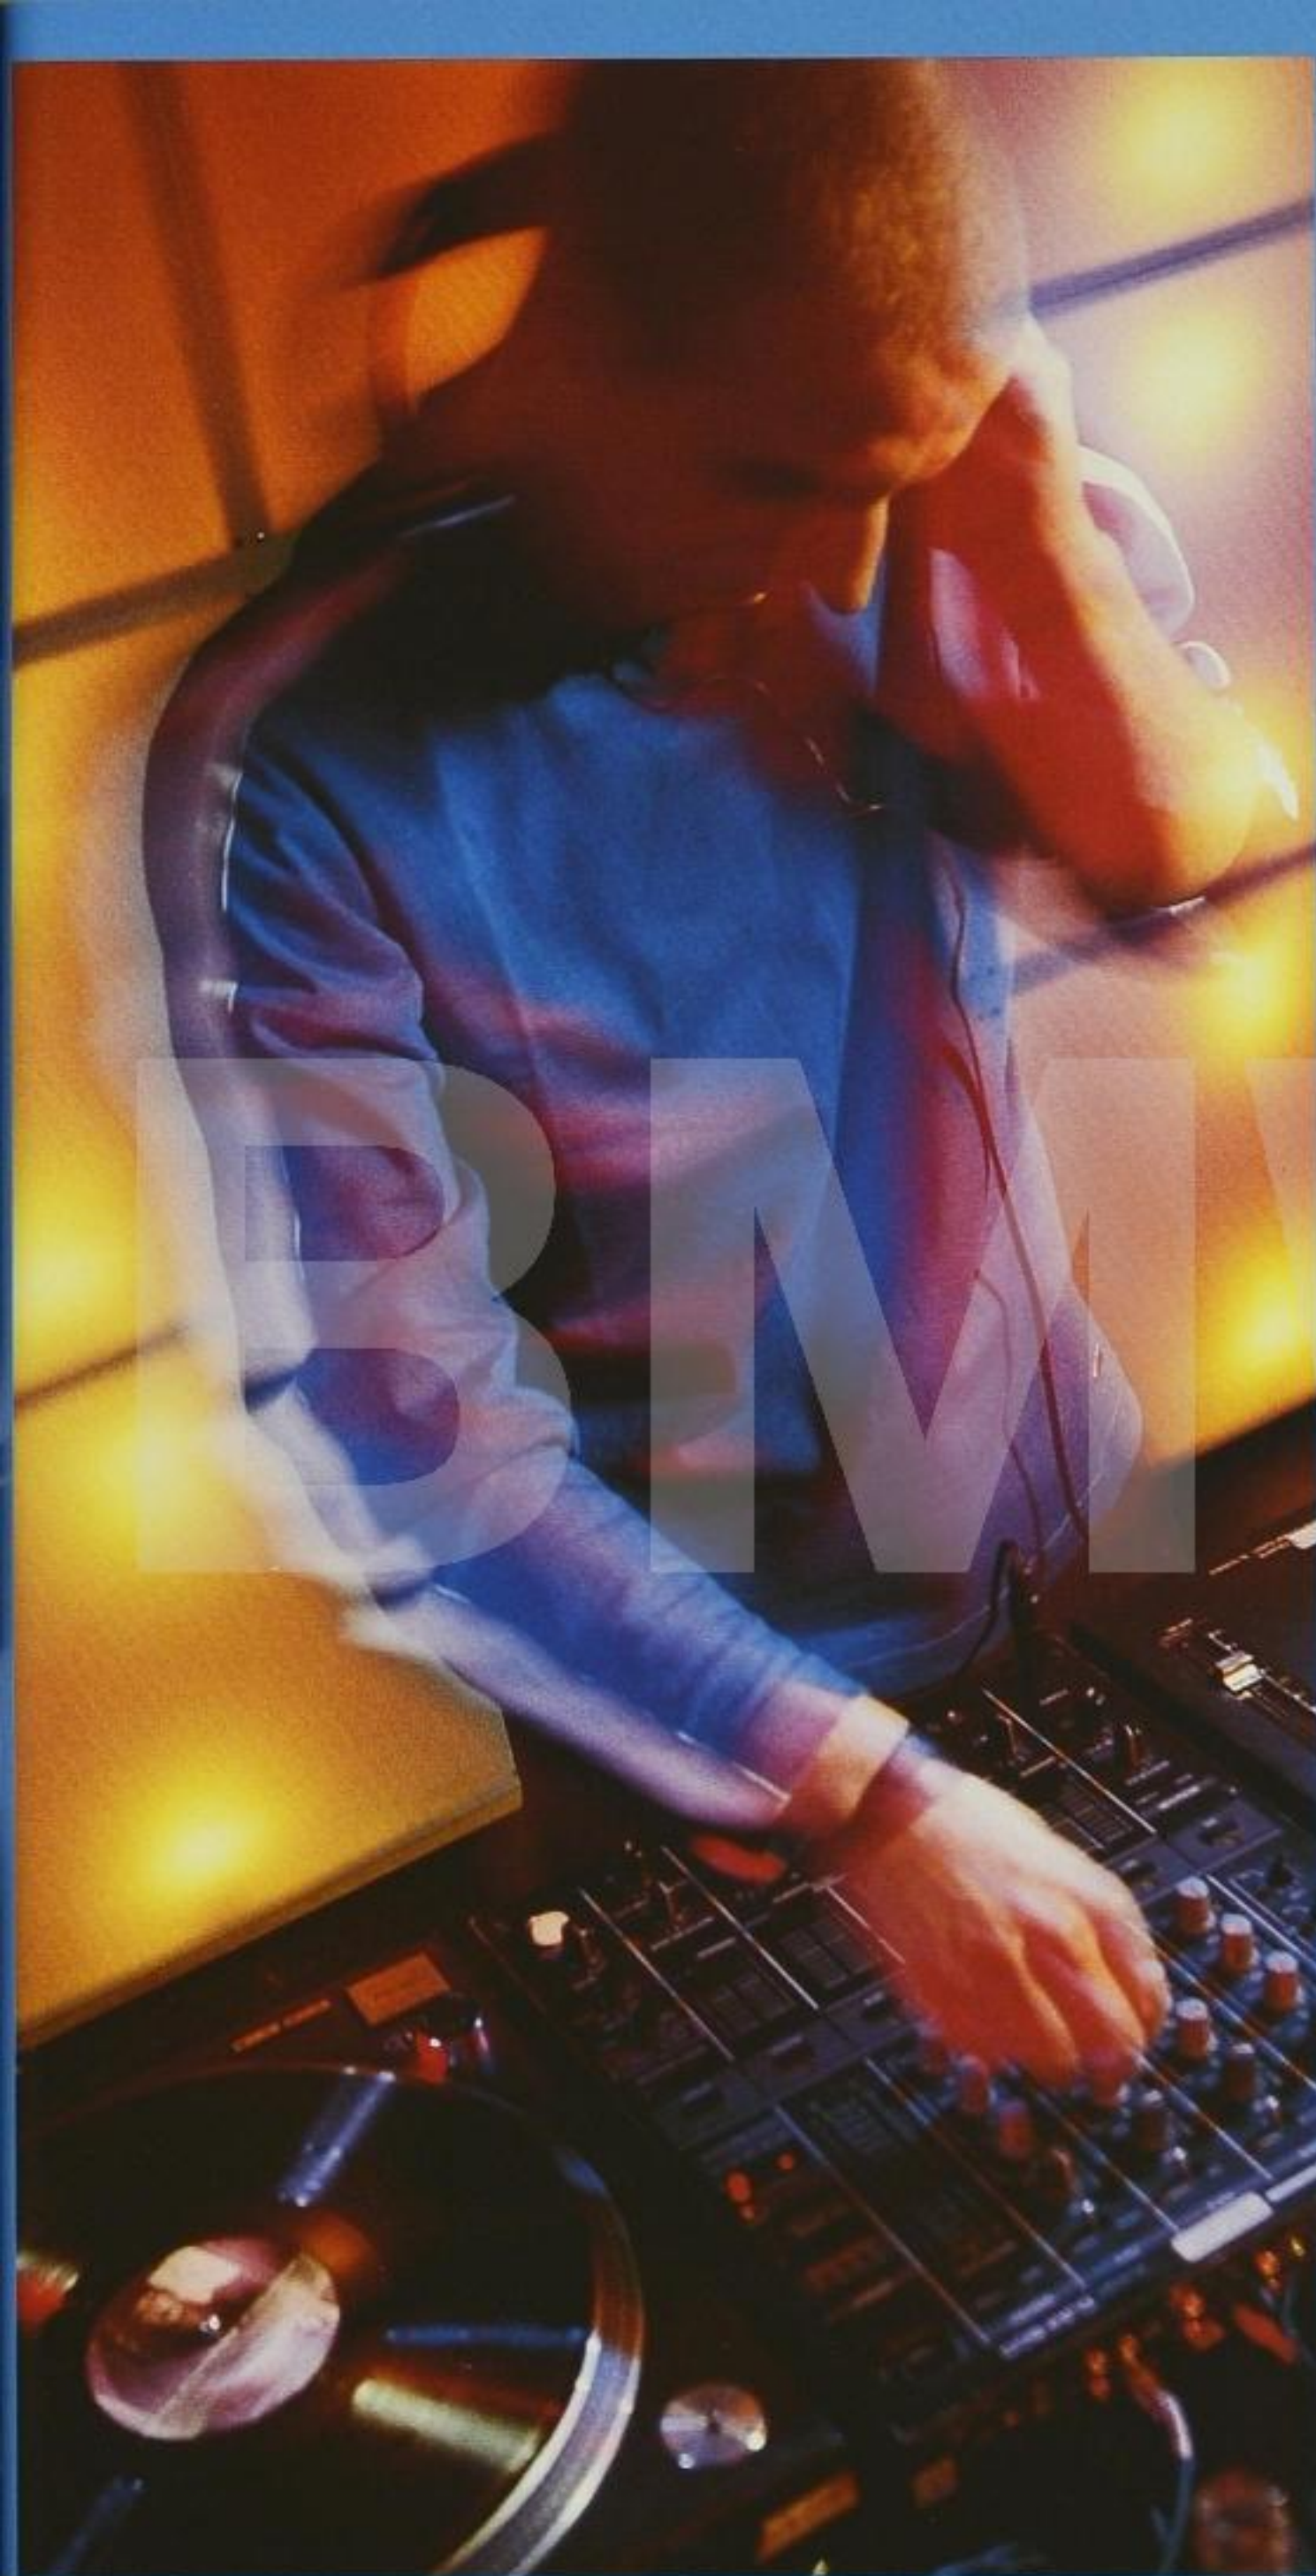

This phase allows you to listen to your favourite songs in MP3 format. The audio functions are played back over the front speakers when using the Radio Wave or Boost, and over the entire speaker system when used in conjunction with the CD changer (or SoundModul).

6+7 Radio Navigation

The navigation system's computer relies on speedometer signals and the GPS Global Positioning system to an accuracy of within 5 meters. The VDO MS4200 systems provide voice directions along with arrows to indicate your route. The tuner features FM, (RDS-EON-NEWS-PTY) MW, LW and SW. The amplifier's effective power rating is 4 x 40 watts. Includes CD drive, digital CD changer input and flip down front, detachable.

One hallmark of an exceptional automobile is the way it offers the ideal solution in every situation. The MINI is such a car – a virtue reflected in its extensive and multi-faceted array of accessories. In the MINI, mobile communications means more than access to the latest generation of navigation systems, mobile phones and CD changers – it means that all of these systems complement each other perfectly. Therefore, when you use the mobile phone with the hands-free device, for example, your radio is temporarily muted. However, you should not be affected in the same way!

1 Mobile phones

The MINI package for mobile phones contains a hands-free device, telephone console, charger, and convenience function with radio mute. Suitable mobile phones manufactured by Motorola, Nokia, Siemens or Ericsson are available at your nearest MINI dealer.

2 Aerials

The powerful reception **window aerial** is fitted on the wind-screen, level with the rear-view mirror. Alternatively, a **roof aerial** is available (not ill.).

3 Telephone console

The telephone console is perfectly suited to the mobile phone being used.

4 Hands-free kit

Allows simultaneous driving and mobile phone use. The hands-free device is available for all the mobile phones stated. The microphone is coordinated with the model of phone in use. Includes automatic radio mute function.

5 SoundModul

Large capacity speakers, superb bass response (16 cm diameter low-frequency speakers at rear) along with improved balance in frequency response for the entire system. Premium components unite in a combination of amplifier and speakers precision-tuned for Radio Wave and Boost functions, amplifier: 4 x 70 watts, effective SPL more than 121 dB (A). The MINI SoundModul is based on the **MINI stereo system**.

6-8 Sony radios with cassette, CD or MD player

Sony radios provide 4 x 20 watts, Sony radios range from Radio/cassette to Radio/Minidisc with flip down detachable front panel. Specifications include CDR/RW compatibility, FM, AM and LW with RDS-EON.

9 HiFi harman/kardon speaker system

Makes a special sound experience possible. A total of 320 watts Digital Sound Processor (DSP) amplifier output and eight speakers deliver a full, transparent sound with powerful bass and treble. The HiFi speaker system is based on the **MINI stereo system**.

10 CD changer

Installed in the luggage compartment, it holds up to six CDs.

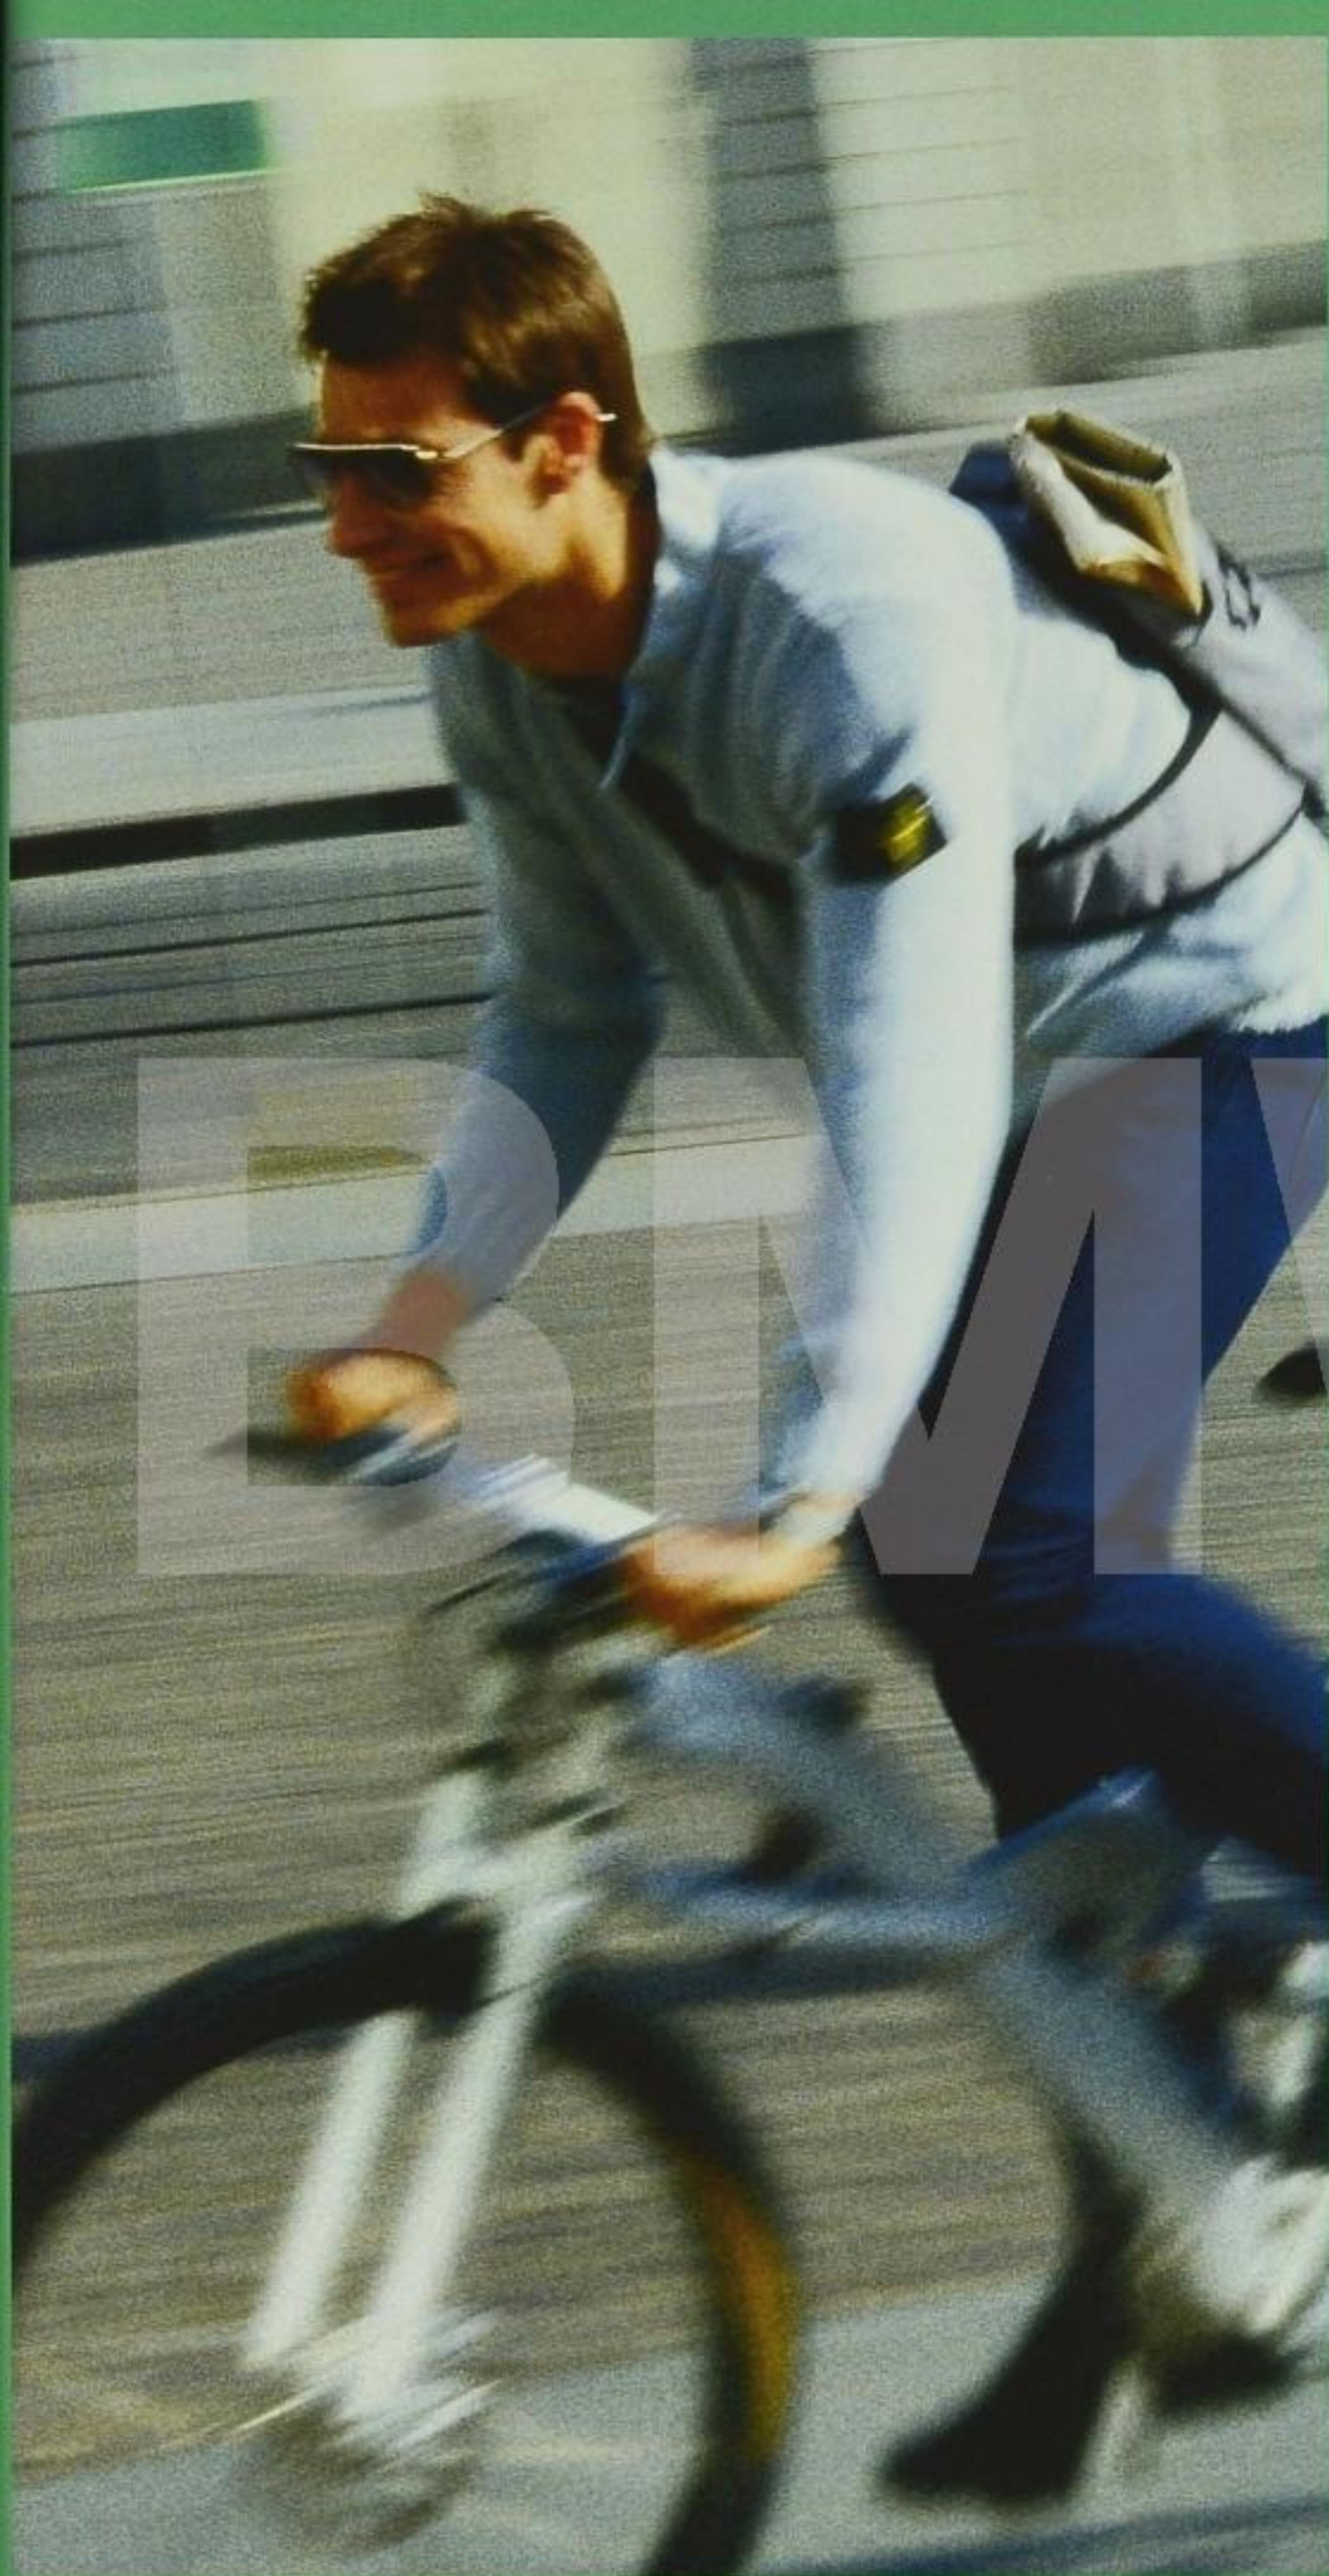

AG

THERE IS NO REASON FOR
YOU TO HOLD BACK. AND
THAT APPLIES TO LUGGAGE
TOO: WITH THE MINI ROOF
RACK SYSTEM.

2

3

4

MINI MAG

Driving a MINI is a life-changing experience. Because the MINI perfectly fulfils our requirements for a car – it looks classy and oozes class. Because it is fun to drive and offers a unique driving feel. And gives us the freedom to do what we consider important – arranging our precious free time.

1-4 Base rails

Your MINI dealer installs four anchorage points, each consisting of two threaded sockets, along with guard caps in either black or your car's colour for use when the base rails are removed. The cross bars consist of high-strength extruded aluminium tubing that combines extra stability with resistance to corrosion. With an effective width of about 900 mm, they support roof loads of up to 75 kg (see also pages 52-54, figs 1-6).

1 Touring bike carrier, lockable

A stable mounting for transporting a bicycle with a frame diameter of 25-53 mm and tyres of 25-57 mm. It is possible to fit four cycle carriers to one base system. In addition, a uniform locking system can be fitted which enables all four cycle carriers to be locked using one key. For availability of BMW bikes please contact your local MINI dealer.

2-4 Bicycle lift

A bicycle can be lifted onto the roof rack and taken down again effortlessly. The system is suitable for different sized bicycles.

2

3

4

WALL G

Mornings to the office, evenings on the town. And weekends on the road with friends. Every drive in the MINI is a potentially moving experience, because it carries more than good feelings. The base carrier for the roof-mounted luggage rack is just one example. The range of MINI luggage compartment accessories is another.

1 Roof box

Lockable roof box with central locking developed specifically for the MINI. Black lower tray, silver metallic upper tray. Capacity approximately 350 l, weight around 16 kg. Dimensions (L x W x H) 1,900 x 600 x 350 mm.

2 Universal holder

The universal holder, held on four base rails, incorporates four adjustable retaining clips, two tensioning straps and four belt eyelets. This ensures that bulky items are also firmly secured.

3 Surfboard carrier

The carrier features support surfaces in impact-resistant plastic, an integrated mast bracket, anchorage rings and retaining straps.

4 Snowboard carrier

Suitable for transporting up to two snowboards.

5 Cargo box carrier

High capacity unit in corrosion-resistant steel.

6 Ski carrier

Suitable for transporting up to four pairs of skis.

Ski and snowboard set (not ill.)

In addition to the snowboard carrier you can also install a ski carrier.

7 MINI cooler, electric

No CFCs, cools contents to roughly 20 °C below the ambient temperature. Capacity: 12 litres.

8 Protective rear cover

Waterproof, dirt-repellant artificial leather. Protection for the doors on both sides.

9 Luggage compartment cover

An easy-to-use cover designed to protect the entire boot from prying eyes.

10 Form-fitting luggage compartment liner

Protects the entire luggage compartment. Resists acids and breakage.

11 Form-fitting mat for the luggage compartment

Protects against dirt and moisture. Features a slip-resistant surface and custom-moulded contours that conform to the shape of your luggage compartment. Made in wear-resistant plastic, resists oil and solvents.

12 Anti-slip mat

Specially designed to prevent cargo from sliding. Includes a retaining strap, shaped for a perfect fit in your luggage compartment.

13 Luggage compartment floor net

Secures cargo in the luggage compartment. Install by attaching to the robust S-hooks already provided. Highly flexible material.

Trailer coupling (not ill.)

Designed to pull loads of up to 650 kg (max. drawbar weight up to 75 kg). The mount is not visible when the ball hitch attachment is removed.

CHILDREN NEED SECURITY.
SO DO PARENTS. MINI
ACCESSORIES ARE INTENDED
TO REASSURE BOTH.

BMW

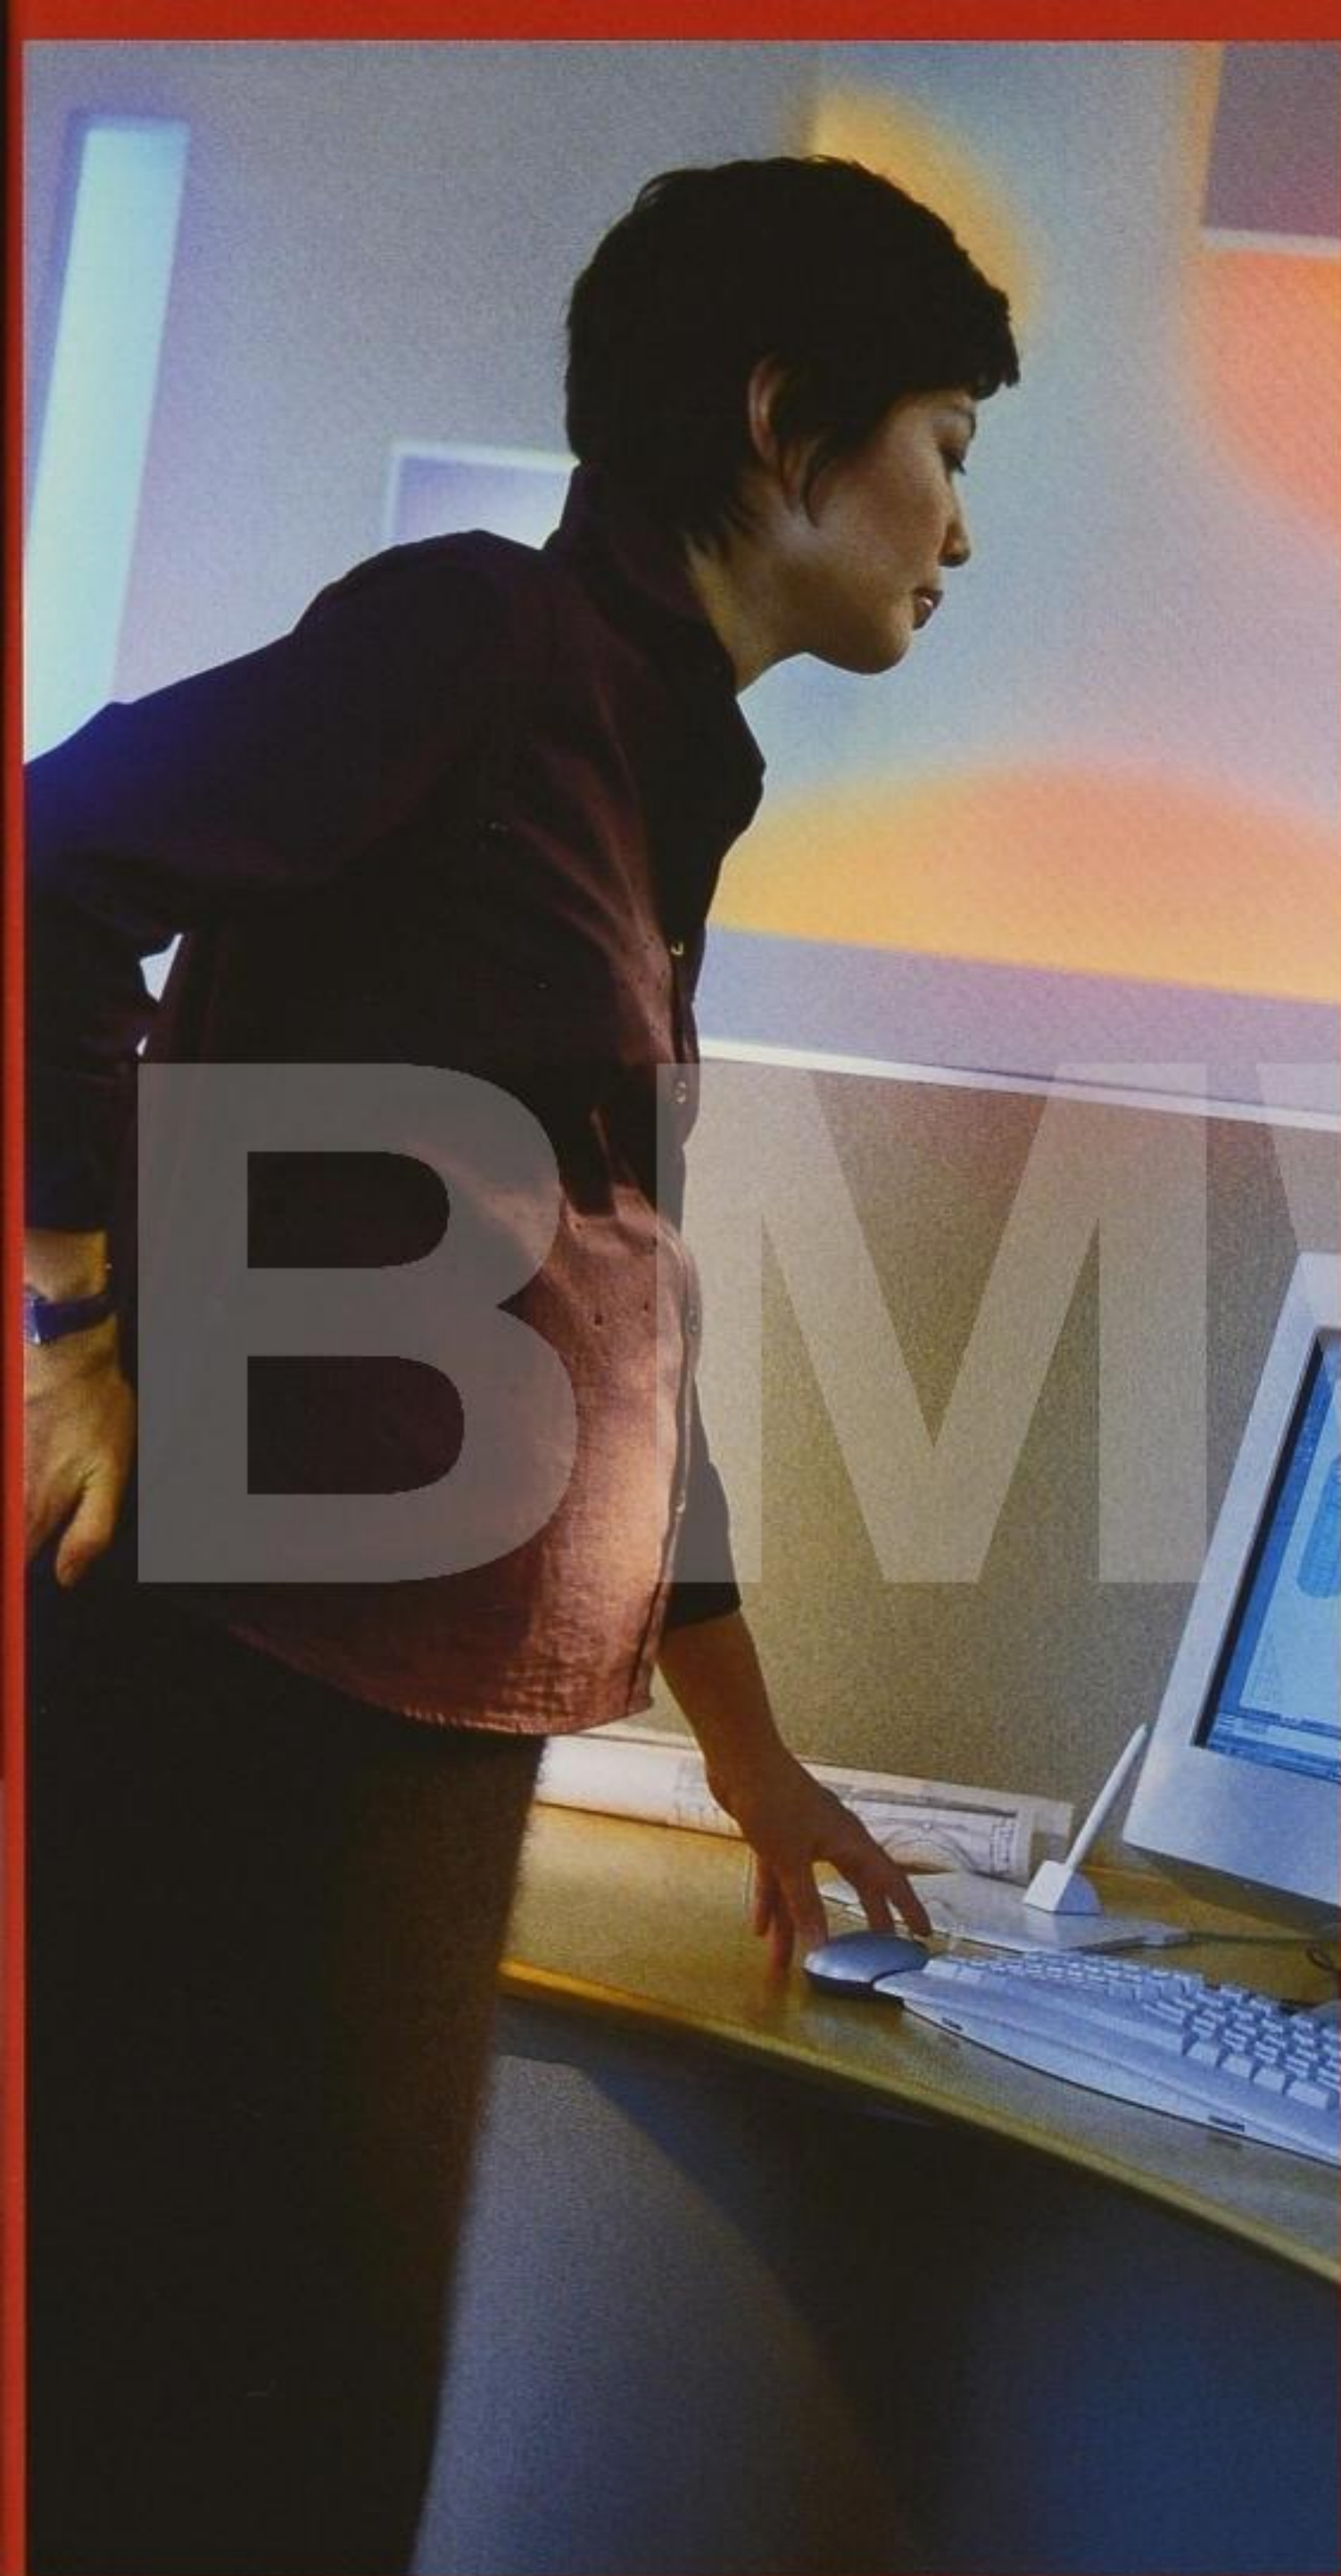

BMW AG

BMW AG

MINI child seats	Age	Weight
MINI Baby Seat 0+¹	0-18 months	up to 13 kg
MINI Junior Seat I-II^{1, 2}	approx. 9 months-7 years	9-25 kg
MINI Junior Seat II	approx. 3.5-7 years	15-25 kg
MINI Junior Seat III	approx. 6-12 years	22-36 kg

¹ with and without ISOFIX, ² ISOFIX function may only be used up to 18 kg

1+2 Headlamp washers and heated windscreen washer nozzles

Prevents dirt from accumulating on your headlamps to ensure improved visibility. The heated spray nozzles (fig. 2) let you clean the windscreen efficiently and effectively, even at sub-zero temperatures.

2 Xenon headlamps

Bright, balanced, long-range illumination of the road surface, with no glare for oncoming traffic. Includes automatic headlamp range adjustment.

2 Front fog lamps

These round fog lamps offer enhanced illumination with wider coverage of the road while also reducing back-glare.

3 Theft alarm system

With radio-frequency remote control, responds to attempts to break into or tamper with the car with a siren accompanied by activation of the hazard warning flashers.

4 Park Distance Control

Facilitates parking and manoeuvring. Obstacles closer than a distance of 1.5 m are detected and signalled by an audible warning.

5 Emergency accessories

For stowing emergency accessories safely in the luggage compartment. It can hold a warning triangle, first aid pouch, jump leads and tow-cable, for example. A **powder-type fire extinguisher** (1 litre capacity) and a **warning vest for adults and children** are also available.

6 TRACKER

If your MINI disappears, TRACKER always keeps track of it. Car thieves are becoming more sophisticated. Fortunately for you, so is MINI's additional security. TRACKER products allow the police to track your stolen vehicle quickly, safely and ensuring a prompt recovery. Please contact your local dealer for further information.

7 Car cover, indoor

Highly elastic anti-static material featuring the MINI logo.

8 Car cover, outdoor

This watertight yet breathable car cover has been specifically developed for outdoor use. It is made from light-weight and tear-resistant nylon fabric and has a UV-resistant surface. With MINI logo.

The only thing modest about the MINI is its size. Aside from the extra avoirdupois, there are no sacrifices – certainly not in the realm of safety. Our accessory catalogue represents the logical extension of this philosophy: by including such features as xenon headlamps – hardly standard fare in this class – and fog lamps as well as a range of child seats suitable for every age group. We offer everything you need for even greater driving satisfaction and safety in your MINI.

9 Mini Junior Seat I-II, with and without ISOFIX

Includes backrest with height and tilt adjustment as well as the restraint tray (required for children weighing between 9 and 18 kg). Can be used with the car's seatbelt once the restraint tray is no longer needed. For more detailed information, see the table.

10 MINI Baby Seat 0+, with and without ISOFIX

For children between three and 13 kg (up to an age of about 18 months). This rearward-facing child seat is suitable for installation in the rear, or in the front passenger's seat provided that the air-bag has been deactivated. Seating and reclining positions are both adjustable, and a seat insert is also available for small infants. The baby cradle is the ideal infant carrier.

11 Buggy

The baby cradle can also be mounted on this pram with the aid of an adapter.

9
