SURROUND YOURSELF WITH
MINI SOUND.

WHAT IS MINI SOUND?

It can be anything you like, your favourite CDs, radio stations, or MP3 tracks.

Rich, clear sound for every journey and every mood, all brought to your MINI with a little help from SONY technology.

Talk to your MINI Dealer about MINI SOUND.

We think you'll like what you hear.

CD CHANGER CDX-T69.

- Boot mounted 6 disc CD Changer
- CD text – only disc title
- CD-R/RW playback
- Loading system: Magazine XA-T7
- Requires compatible head unit to operate

RRP inc VAT £165.00

Connect your Apple iPod, iPod mini, or iPod nano to your MINI's audio system with this small cable hidden away in the glovebox. It's easy to change tracks as you can control your iPod through your radio or multifunction steering wheel, and you won't need to worry about your iPod battery life, as it charges itself while you're on the move.

IPOD INTERFACE.

- Next / previous track
- Skip tracks in steps of 10 (not in RND and RPT mode)
- Fast forward / reverse (in RND and RPT mode only)
- Random play
- Scan SC
- Playback 5 special play lists
- Playback all tracks

RRP inc VAT £125.00

The following versions are compatible with the interface:

- iPod (G3, G4, G5) with docking connector from software version 2.2 onwards
- iPod mini from software version 1.1 onwards
- iPod nano from software version 1.0 onwards

The iPod connector can only be fitted to MINI Boost radios (SA 657), it will not work in conjunction with any SONY radio.

Please note that the iPod interface can be fitted with a CD changer. However, the CD changer must be disconnected and can therefore no longer be used, even when the iPod is not connected.

THE RANGE.

TECHNICALLY SPEAKING.

DRIVE-S – Ground-breaking SONY CD chassis features Low Mass Optical Pick-up, Shock Damper and S-MOSFET technologies for extended performance and durability.

DRIVE-S HX – Enhanced Drive-S technology, SONY Drive-S HX takes drivers to new heights, utilising specially selected audio grade components. The result is crystal-clear audio reproduction with superior sound separation.

S-MOSFET – SONY designed power amplifier, output as indicated.

CD-R/RW PLAYBACK – Indicates the ability of individual CD tuners and changers to support the playback of CD-R/RW.

CD TEXT – All SONY car audio head units and changers equipped with this feature are able to read additional text information; e.g. CD title, artist, track name. This information is recorded on the CD during production.

ID3 TAG – So called ID3 tags, which contain track and title information as well as details on the artist. Editing can be done on any PC or Macintosh computer.

AUXILIARY INPUT – Lets you connect various portable audio devices via the 3.5mm jack socket (front) or phono connections (rear), as indicated.

DIGITAL-TO-ANALOGUE CONVERTER – Converts the digital signal from a CD into an audio signal for the speakers. The new SONY 24 bit digital-to-analogue converter virtually eliminates the audio distortion, resulting in improved sound quality that's true to the original source material.

EQ3 – Integrated 3-band equalizer which precisely adjusts the low, mid and high frequencies according to music genre, ensuring a customized soundfield.

PRE-AMP OUTPUT – Allows you to add an optional power amplifier – number of outputs as indicated.

SUB SWITCHABLE – Activated via the menu the head unit can switch from a full range audio pre-out to a dedicated sub-output. Thereby a flexible method for attaching an appropriate power amplifier/speaker combination.

DETACHABLE FRONT PANEL – Allows the user to remove the front panel for maximum security.

FL LCD (8-GRADE BLUISH WHITE) – Fluorescent display that employs a brighter self-emitting light for sharper images.

BBE® MP HIGH DEFINITION SOUND – Restores and enhances harmonics lost in previously compressed ATRAC3, WMA, MP3 music files. By detecting and boosting the reduced harmonics, BBE® MP puts the warmth and vibrancy back into your music.

DIGITAL SOUNDSTAGE ORGANIZER – Based on innovative 3D virtual sound technology, DSO and advanced DSO II elevate the audio from foot level speakers to your ear level for an improved sound experience in your car.

DSP – New digital sound processor with time alignment, 13 band 4 channel equalizer and 3D dynamic sound stage organizer.

RDS EON RADIO DATA SYSTEM – A digital information system broadcast along with the radio signal that delivers enhanced FM service and displays the name of the station.
