RECYCLING.

At every stage, from design to disassembly, recycling is central to the MINI philosophy. For example, all the materials used in its manufacture were selected because they can be used in a sustainable and environmentally friendly way. And every MINI is built to be easily and economically recycled when its driving days are finally done. We have been working on this approach since 1994 at the BMW Group Recycling and Disassembly Centre in Munich, the only facility of its kind. Your authorized MINI dealer will also be pleased to advise you on the disposal of your old vehicle.

WARRANTY.

Every MINI is supplied with a 2-year unlimited mileage dealer warranty. (This excludes wear-and-tear parts.)

Every MINI also comes with a 12-year anti-corrosion warranty, which covers the vehicle against rusting of the body panels. This warranty is dependent on any previous damage to the vehicle body or under-body (e.g. stone impact damage, scratches, dents, accident damage or other damage caused by environmental factors) having been correctly repaired in accordance with current MINI guidelines.

The painted surfaces of the car are covered by an extended 3-year warranty. This excludes any damage to painted surfaces caused by external or environmental factors.

The models, standard and optional equipment and combinability of options in this flyer relate to cars supplied by BMW AG for the German market.
